This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

CENSUS

OF THE

STATE OF MICHIGAN,

1884.

COMPILED AND PUBLISHED BY THE SECRETARY OF STATE.

IN ACCORDANCE WITH AN ACT OF THE LEGISLATURE APPROVED JUNE 5, 1883.

VOLUME I.

POPULATION; BIRTHS, MARRIAGES, AND DEATHS; AND CHURCHES, SCHOOLS, AND LIBRARIES.

BY AUTHORITY.

LANSING:

LETTER OF TRANSMITTAL.

MICHIGAN,
OFFICE OF THE SECRETARY,
Lansing, June 1, 1886.

HON. RUSSELL A. ALGER,
Governor of the State of Michigan:

SIR,—I have the honor to submit herewith the Census of this State for the year 1884. I cannot do so, however, without commending in the most earnest manner the ability and unflagging industry of Mr. Robert L. Hewitt of this Department, who has superintended the entire work from its inception. Whatever merit it possesses is largely due to his untiring zeal.

I have the honor to remain yours respectfully,

Secretary of State.

TABLES.—POPULATION.

TABLE I.	Population, Total, by Sex, and at Each Period of Age, and Number of Families and Dwellings	2-161
II.	Population, Native, by Age and Sex	162-169
III.	Population, Foreign-born, by Age and Sex	170-177
IV.	Population, by Color and Civil Condition	178-257
V.	Population, by Nativity and Parent-nativity	258-340

VOTING, MILITARY, CHILD-BEARING, AND SCHOOL AGES.

TABLE VI.	Population, Male, of Voting and Military Ages; Female, of Child-bearing Ages; and of Primary School Ages, by Sex	341-385

SCHOOL ATTENDANCE.

TABLE VII.	Pupils Attending School, by Age, Sex, Nativity, and Parent-nativity	386-418
VIII.	Pupils Attending School in Cities, by Age, Sex, Nativity, and Parent-nativity,	419

ILLITERACY.

TABLE IX.	Illiterate persons ten years of age and over, by Sex, Nativity, and Parent-nativity	420-443
X.	Illiterate persons in Cities, by Sex, Nativity, and Parent-nativity	444-459

DEFECTIVE CLASSES.

TABLE XI.	Blind, Deaf and Dumb, Insane, Epileptic, Idiotic, and Dumb, by Sex and Age, for State	460-463
XII.	Blind, Deaf and Dumb, Insane, Epileptic, Idiotic, and Dumb, Total and by Sex, for State and Counties	464-466

PERSONS SICK, OR TEMPORARILY DISABLED.

PAGE.

TABLE XIII. Age and Sex of Persons Sick or Temporarily Disabled, June, 1884, with nature of sickness or disability 467-478

WAGE-WORKERS UNEMPLOYED.

TABLE XIV. Wage-workers Unemployed, by Sex, and Number of Months of Time Lost.. 479-482

OCCUPATIONS.

TABLE XV. Sex, Age, and Nativity of Persons Engaged in each Specified Occupation and Class of Occupations, for State 483-498
All occupations 483
Agriculture 483
Professional and personal service 484-487
Trade and transportion 487-490
Manufacturing, mechanical and mining industries 491-498
XVI. Sex, Age, and Nativity of Persons engaged in each Specified Occupation and Class of Occupations, for Incorporated Cities 499-513
All Occupations 499
Agriculture 499
Professional and personal service 500-503
Trade and transportation 503-506
Manufacturing, mechanical and mining industries 506-513
XVII. Occupations of Fathers of Children under Fifteen Years of Age, and by Sex, the Number of Children whose Fathers were engaged in each Specified Occupation and Class of Occupations 514-524
All occupations 514
Agriculture 514
Professional and personal service 514-516
Trade and transportion 516-519
Manufacturing, mechanical and mining industries 519-524

TABLES.—BIRTHS, MARRIAGES AND DEATHS.

BIRTHS.

TABLE I. Births, by Sex, and Months 526-530
II. Births, by Sex, Color, and Parent-nativity 531-535
III. Still-births, by Sex 536-537

MARRIAGES.

TABLE IV. Marriages during census year by Months, for State and Counties 537-539
V. Marriages, by Sex and Age of Persons contracting, for State and counties.. 540-543
VI. Marriages of females at each period of age to males of specified ages 544
VII. Marriages, by Months, during census year, of Persons who were Inhabitants of State June 1, 1884 545-547
VIII. Inhabitants, June 1, 1884, who were Married during census year, by Sex and Age 547-550
IX. For Inhabitants June 1, 1884, Married during census year,—number of females at each period of age married to males of specified ages 551
X. Inhabitants June 1, 1884, Married during census year, by Sex, Color and Nativity 552-554
XI. Place of Marriage of Inhabitants June 1, 1884, Married during census year... 555-557

DEATHS.

TABLE XII. Deaths by Months and by Sex and exact age of Decedents, for the State... 558-564
XIII. Deaths by Time of Residence of Decedents in State 565-570
XIV. Deaths by Sex, Color, and Civil Condition of Decedents 571-575
XV. Deaths by Sex, Nativity, and Parent-nativity of Decedents 576-581
XVI. Deaths by Months, and by Sex and Age of Decedents, for State and counties 582-591
XVII. Deaths by Months and Specified Cause, with Sex and Age of Decedents.... 592-620

OCCUPATION OF DECEDENTS.

PAGE.

TABLE XVIII. Occupations of Persons who died in Michigan during census year, and, by Sex, Age, and Nativity, the number of such Persons engaged in each Specified Occupation and Class of Occupations 621-629
All occupations 621
Agriculture 621
Professional and personal service 621-623
Trade and transportation 623-625
Manufacturing, mechanical and mining industries 625-629
XIX. Number of Decedents in Cities who were engaged in each specified class of Occupations by Age, Sex and Nativity 630
XX. Occupations of Fathers of Decedents under fifteen years of age and, by Sex, the Number of such Children whose Fathers were engaged in each specified Occupation, and Class of Occupations 631-638
All occupations 631
Agriculture 631
Professional and personal service 631-632
Trade and transportation 633-634
Manufacturing, mechanical and mining industries 634, 638

TABLES.—CHURCHES, SCHOOLS, LIBRARIES.

CHURCHES.

TABLE I. Church Organizations, by State and county 640-642
II. Church Organizations by Denominations, for the State 643
III. Church Organizations by Denominations, for the State and counties 644-668

SCHOOLS.

TABLE IV. District Schools 669-672
V. Graded Schools 673-675
VI. Seminaries and Academies 676
VII. Colleges 677
VIII. Parochial Schools 678-679

LIBRARIES.

TABLE IX. Libraries, total Number and Number of each kind, classified according to number of Volumes, for State 680
X. Libraries, total Number and Number of each kind, classified according to number of Volumes, for Cities 681
XI. Libraries, for all kinds and each kind specified, the total Number, and Number of Volumes, for State and Counties 682-688

INTRODUCTORY.

The census of 1884 has been taken and compiled pursuant to the provisions of Act No. 146, Laws of 1883. The method of collecting and compiling this census is different from that provided by the law under which the previous State census was taken, in that the enumeration was made in June, by persons appointed for that especial purpose, and the work of compilation all done in the office of the Secretary of State, while in 1874 the enumeration was made at the time of taking the assessment, by supervisors and assessors, and the first condensation made by these officers, the condensed statement alone being forwarded to the Secretary of State. It is clear that under the present law the amount of labor to be done in the office of the Secretary of State is vastly greater than was required by the law of 1873. The practice of having each enumerator condense the returns for his own enumeration district may possibly insure quick work, but has nothing else to recommend it, the condensations thus made having never proved satisfactory. It is now pretty well understood that accuracy in compilation is attained only by having the entire work done under one supervision.

By the provisions of section seven of the census law, the schedules, duly certified, were to be forwarded to the Secretary of State on or before the tenth day of July. Very few were forwarded previous to that date, but nearly all were received at this office before the first of August. They were properly arranged as speedily as possible, and on the tenth of September the result of the first count of the population was published by township and ward.

The law is by far the most comprehensive census law ever enacted in this State, and the present is the most complete census of Michigan ever taken, not excepting the U. S. census of 1880. The original schedules on which the enumeration was made comprise 130,000 pages, and, bound, make 244 volumes, each of which is as large as can be conveniently handled. The questions relating to each inhabitant were thirty-two in number, or 59,317,056 for the entire population. There were nineteen questions relating to decedents, one hundred and fourteen relating to agriculture, thirty-one to manufactures, six to churches, ten to each of the different kinds of schools, and two to libraries.

The enumeration, with few exceptions, seems to have been carefully and intelligently made, yet, as will always be the case so long as this kind of work is done by inexperienced men, all of the returns, when received, were more or less inaccurate and incomplete. The

work of searching out errors and omissions, and of securing, by correspondence, the necessary corrections, required several months for its completion. The compilation in this office has been made with the utmost care, the totals in every instance being carefully verified. The published tables do not, of course, show all the combinations of facts possible to be made in a census of this magnitude, but with two unimportant exceptions, every fact embraced in the census of population, and all of the facts relating to decedents, agriculture, churches, schools and libraries are tabulated and published.

The industrial statistics are seriously defective. After a careful examination of the returns of each industry the Department was convinced that the best compilation possible to be made of "materials used," of "productions," and of some other data included in the returns would be valueless. The published tables show only the number of establishments, capital invested, average number of hands employed, the total amount paid in wages, and the motive power. While the returns upon these subjects are far from satisfactory, the defects do not appear to be such as to warrant their rejection.

Our experience in collecting industrial statistics is not exceptional. Like errors and discrepancies occurred in the returns of 1874, and in New York, in 1875, no compilation of the returns of manufactures was made. After working upon them for a few days the compiler found the returns so "incomplete and inexact as to be worthless for statistical purposes."

A provision of the first constitution of this State required that "The Legislature shall provide by law for an enumeration of the inhabitants of this State, in the years one thousand eight hundred and thirty-seven, and one thousand eight hundred and forty-five, and every ten years after the said last mentioned time." The present coustitution contains a similar provision, but requires the State census to be taken in the year 1854, and every ten years thereafter. By the constitution of 1835 each State census, after that of 1837, was to be taken five years after a U. S. census, the National and State censuses thus furnishing quinquennial censuses of the State. By the change in 1850 the period from National to State census is four years, and from State to National census six years. It is obvious that the year that is intermediate between the years in which two U. S. censuses are taken is the natural and proper time for taking a State census, and it is required to be taken in this year in sixteen States, viz: California, Colorado, Florida, Iowa, Kansas, Louisiana, Massachusetts, Minnesota, Nebraska, Nevada, New Jersey, New York, Oregon, Rhode Island, South Carolina, and Wisconsin.

With the evident purpose of encouraging State censuses in the "year which is the mean between the decennial censuses of the United States," the National government incorporated the following in the census law of 1879:

"SEC. 22. That if any State or Territory, through its duly appointed officers or agents, shall during the two months, beginning on the first Monday of June, of the year which is the mean between the decennial censuses of the United States, is by this act directed to be taken, take and complete a census in all respects according to the schedules and forms of enumeration in the census of the United States, and shall deposit with the Secretary of the Interior, on or before the first of September following, a full and authentic copy of all schedules returned and reports made by the officers and agents charged with such enumeration, then the Secretary of the

Treasury shall upon receiving a certificate from the Secretary of the Interior that such schedules and reports have been duly deposited, pay on the requisition of the Governor of such State or Territory out of any funds in the treasury, not otherwise appropriated, a sum equal to fifty per centum of the amount which was paid to all supervisors and actual enumerators within such State or Territory at the United States census next preceding, increased by one-half the percentage of gain in population in such State or Territory between the two United States censuses next preceding: Provided, that the blank schedules used for the purpose of the enumeration herein provided for shall be similar in all respects of form, and size of heading, and ruling to those used in the census of the United States."

It is doubtful if the provisions of this section are sufficiently liberal to accomplish the purpose intended. Our experience proves that not less than two months time is required to make an enumeration, transmit the blanks to the Secretary of State, and arrange them in order for use. This leaves but one month—August—in which to hunt up and correct errors that are certain to occur in a work of this magnitude, and to make "a full and authentic copy of all schedules returned, and reports made by the officers and agents charged with such enumeration," and deposit the same with the Secretary of the Interior at Washington,—a large amount of work to crowd into a single month. The copying of the schedules would alone require a thousand or twelve hundred clerks for twenty-five days. The section above quoted directs the payment to the State of "a sum equal to fifty per centum of the amount which was paid to all supervisors and actual enumerators * * * * at the United States census next preceding, increased by one-half the percentage of gain in population * * * * between the two United States censuses next preceding." By correspondence with the department at Washington it is learned that the amount paid to all supervisors and actual enumerators in this State in 1880 was $71,192.06. Fifty per centum of this amount is $35,596.03, which, increased by one-half the percentage of gain in population from 1870 to 1880, or $6,805.96, gives $42,401.99, as the amount Michigan would have received from the general government had the present census been taken in conformity with the provisions of the National census law. As stated above, it would take a thousand or twelve hundred clerks twenty-five days to copy the schedules. This would cost the State from sixty to seventy thousand dollars, or from eighteen to twenty-eight thousand dollars more than the amount that would be received from the National treasury.

EARLY HISTORY OF MICHIGAN.

Michigan made very slow progress in settlement and population from its discovery up to 1820. For the purposes of this census a brief review of the early history of the State is pertinent, furnishing, as it does, abundant reasons why it could not have been otherwise.

From its first discovery, about 1610, until 1763, the territory was claimed, or governed by the French. It was then ceded to Great Britain, and in 1783, at the close of the war of the Revolution, was transferred to the United States. The British government, in violation of the treaty, retained possession of the military posts of the Territory, and it did not come into actual American possession until July 11, 1796.

It was attached to the Northwest Territory until 1802, when, by act of Congress, that portion west of the east line of Indiana became a part of the Territory of Indiana. In 1805 the Territory of Michigan was constituted, with the provisions of the Ordinance of 1787 as its fundamental law. It included "all that part of Indiana Territory which lies north of a line drawn east from the southerly bend or extreme of Lake Michigan, until it shall intersect Lake Erie, and east of a line drawn from the said southerly bend through the middle of said lake to its northern extremity, and thence due north to the northern boundary of the United States." In 1816 a strip of land equal to thirty townships was taken from the southern portion of the Territory, and became a part of the State of Indiana. In 1818 Congress increased the area of the Territory, adding all east of the Mississippi river and north of Illinois. In 1819 authority was given to elect a delegate to Congress. The limits of the Territory remained unchanged up to 1834, when all the territory north of Missouri and east of the Missouri and White Earth rivers was added to the Territory of Michigan. It then comprised the area now occupied by the States of Michigan, Wisconsin, Iowa, Minnesota, and a large portion of Dakota. By the organization of Wisconsin Territory in 1836, and the admission of Michigan into the Union in 1837, the State was reduced to its present area.

MICHIGAN UNDER FRENCH RULE.

French navigators of the lakes skirted the shores of Michigan as early as 1612. Jesuit missions are said to have been founded in the Upper Peninsula in 1641. In 1668 Marquette founded a mission at Sault-de-Ste-Marie, and another the same or the next year at Michilimackinac. This last mission was located on the point now known as St. Ignace.

"The missions at the Sault-de-Ste-Marie and Michilimackinac are regarded as the first completely ascertained settlements within the present State of Michigan. There is, at least, undeniable evidence when these missions were founded. Both places were important centers of influence. But while they may be assumed as the pioneer settlements, until further facts are established, there are some things which deserve reference as indicating a probability to the contrary."

"In 1687, upon a controversy between the Governor General of Canada (Denonville) and Gov. Dongan of New York, the former and his agents asserted a French occupancy at Mackinaw for more than sixty years, and French occupation on the lower waters of Michigan from twenty-five to forty years."*

These Jesuit missions were founded to convert the Indians to the Catholic faith. The trading posts were established to enable the owners to realize the enormous profits in the barter of cheap merchandise for furs. Neither priest nor trader cared for the permanent settlement and development of the country by the immigration of French farmers. One sought to sway the Indian by appeals to the better impulses of the heart; the other accepted his habits and customs, and by intermarriage and adoption into tribes acquired great influence. The methods of both were not favorable to the founding of stable colonies.

In 1701 Cadillac arrived at Detroit with a company of one hundred men, one half of the number artisans or tradesmen. This, says Judge Campbell, "was the beginning of the settlement of Michigan for purposes of habitation and civil institutions." The fort or stockade covered but three or four acres of ground, and contained a few houses occupied by the traders and those attached to the fort. Cadillac had received a small grant of land, afterwards increased, upon which improvements were commenced, but he soon incurred the hostility of both the Jesuits and traders at Mackinaw. The Indians were enticed from that post to Detroit, injuring alike the work of the priest and the business of the trader.

The French and English war, which commenced soon after the settlement of Detroit, gave renewed activity to its enemies. The Indians attempted to burn the fort, and again to capture it. At this time in all Canada there were less than 20,000 whites, and Detroit stood almost alone in favor of settlements for farming purposes and the civilization of the Indian.

The first grant of land is reported to have been made in 1707. In 1706 Cadillac had brought French wheat for seed. With the constant danger of Indian hostilities land improvements made slow advances. Cadillac was made Governor of Louisiana in 1710, and Michigan lost her best friend under French rule. That his theory, of civilizing the Indians and making them cultivate the land had been carried out, is shown by the fact that in 1718 the Indians near Detroit were reported as harvesting some wheat, and raising corn, beans, peas, squashes, and melons.

There was little progress under new governors. No attempts were made to secure settlers until a small number arrived from France in 1750. They prospered, for it was stated in 1759 that the new Detroit settlers had taken care of themselves and been selling wheat since 1754.

* Campbell's History of Michigan, page 13.

In 1721, Charlevoix speaks of the fertility of the soil at Detroit, the same land bearing wheat for years without fertilizers. Considerable land was cultivated. The Indians raised and sold provisions in large quantities, and were sharp traders.

Elsewhere there seems to have been no land under cultivation by white settlers. Mackinaw, as a trading point, was a place of great importance and influence. The Chevalier de Repentigny had built a fort at Sault-de-Ste-Marie about 1750, on a land grant of six leagues square. This was the only *seigneurie* granted except to Cadillac. Under Beauharnois settlements were made by the Indians, on the St. Joseph river, at Muskegon, L'Arbre Croche, and at other points. Some grants of land were made to French settlers at Detroit.

During the French occupation the English had constantly claimed the title to the territory through the Iroquois, and were engaged in endless intrigues to control the trade. The Hurons were the natural allies of the French. The Territory had many tribes, and the Detroit river was the great highway of Indian nations. The rivers and lakes abounded in fish and the forests with game. Cadillac, in 1701, had written a full description of the country, in which he says:

"Its borders are so many vast prairies, and the freshness of the waters keeps the banks always green. The prairies are bordered by long and broad rows of fruit trees which have never felt the careful hand of the vigilant gardener. Here, also, orchards, young and old, soften and bend their branches under the weight and quantity of their fruit, toward the mother earth, which has produced them. It is in this land, so fertile, that the ambitious vine, which has never wept under the knife of the vine-dresser, builds a thick roof with its large leaves and heavy clusters, weighing down the top of the tree which receives it, and often stifling it in its embrace."

"Under these broad walks one sees assembled by hundreds the timid deer and fawn; also the squirrel bounding in his eagerness to collect the apples and plums with which the earth is covered. Here the cautious turkey calls and conducts her numerous brood to gather the grapes, and here also their mates come to fill their large and gluttonous crops. Golden pheasants, the quail, the partridge, woodcock, and numerous doves swarm in the woods and cover the country, which is dotted and broken with thickets and high forests of full grown trees, forming a charming perspective which sweetens the sad lonesomeness of the solitude. The hand of the pitiless reaper has never mown the luxuriant grass upon which fatten woolly buffaloes of magnificent size and proportion."

"The fish are here nourished and bathed by living waters of crystal clearness, and their great abundance renders them none the less delicious. Swans are so numerous that one would take for lilies the reeds in which they are crowded together. The gabbling goose, the duck, the widgeon, and the bustard are so abundant that to give an idea of their numbers I must use the expression of a savage, whom I asked before arriving, if there was much game there. 'So much,' he said, 'that they drew up in lines to let the boats pass through.'"

Elk, moose, wolves, bears, rabbits, otters, beavers, and muskrats were found in every part of the territory. Strawberries, raspberries, and other small fruits were indigenous. The sugar maple gave its sweetness to the savage, and the wild bee stored him honey in the monarchs of the forest. The honeysuckle and the Michigan wild rose filled the forest with sweetness, and along the rivers and lakes sprang the lilies with their countless blossoms. It was the ideal home of the men of the forest. Why should they labor when nature spread before them such precious stores?

The squaws cultivated the fields and raised enough corn and vegetables to supply the needs of midwinter. The exports of corn in 1714 were 2,400 bushels. Agriculture, however, was greatly neglected, and the conditions on which grants of land were made tended to discourage any

intelligent efforts at farming. In 1757 the product of wheat was reported at 2,500 bushels, and the same amount of oats and corn. Wheat produced twenty bushels to the acre, and was sown both in the spring and fall. With this abundance the settlers were more than once on the verge of starvation from the consumption of their supplies by roving bands of Indians.

The country was in a disturbed condition for many years before its surrender to the British. Through intrigues the Hurons were by degrees led away from their fidelity to the French, and from 1747 to 1760 the people were kept in an almost constant state of alarm. During the border wars between the French and English Detroit furnished supplies to French troops in Ohio, Pennsylvania, and Virginia. The war resulted disastrously for the French, and New France, so long in their possession, was reluctantly surrendered. Quebec, the stronghold of their dominion, had opened its gates to the British in 1759, but it was not until September 8, 1760, that Montreal and all Canada came into British posession. Four days after Major Rogers was ordered to Detroit. His force was stopped by Pontiac on the way. With the consent of that chief he reached Detroit Nov. 29, 1760. Another year passed by before British garrisons occupied the forts at St. Marie, Mackinaw, and St. Joseph. It was not until February 10, 1763, that by treaty Canada was ceded to Great Britain.

At that time there were about 75,000 whites in all Canada, and possibly two thousand in Michigan. In 1757 it was stated by Bougainville that there were two hundred habitations, and in 1768 there were 514½ acres of land under cultivation, and 9,789 French bushels of corn produced. The territory had belonged to France for 150 years, dating from the founding of Quebec, and had been the site of missions for 90 years. During all these years the colonists had been loyal to France. It had been at the best only a military despotism, conceding few rights to the people, but they had been brave, docile, patient and true for almost a century. The Indians had profited by the skill of their neighbors, and could in times of peace raise sufficient food, and their other needs were supplied through the barter of furs. A hundred years had done less to settle and improve the country than is now often accomplished by some little colony in Dakota during a single year. It was the end of French rule, and fatal had it proved to all real progress.

MICHIGAN UNDER BRITISH RULE.

The British had possession of Michigan from 1760 until 1796, although by the treaty at the close of the War of the Revolution, it had been ceded to the United States. Except the little settlement at and about Detroit, there were a few French traders at Mackinaw, and one family at St. Marie. There was practically no increase of population under British rule. The change of possession intensified the hostility of the savage. The French settlers were compelled to submit by the troops which held the forts. With these troops came Dutch and Scotch traders, who became their most formidable rivals for the limited trade. The French trader had kept cupidity within bounds so as to retain the good will of the Indian. Some of the new traders were disposed to deal fairly. Of others Parkman says, they "were ruffians of the coarsest stamp, who vied with

each other in rapacity, violence and profligacy. They cheated, plundered, and cursed the Indians and outraged their families, offering, when compared with the French traders who were under better regulation, a most unfavorable example of the character of their nation." These men freely supplied the Indians with guns and ammunition, which were soon to be used to plunder and ravage the frontier. The rule of the French had been arbitrary; it remained the same. What the settler had quietly endured under his own flag was not readily borne under his nation's bitterest foe. Military rule was the only law, and the commander was the sole judge and director of the destinies of the people.

The result can readily be foreseen. The Indian had been the natural ally of the French, and both were ready to do anything to restore French dominion. On the western borders of the States to the south settlers were constantly encroaching upon the lands of the Indians. They looked forward to the time when they would be driven from their hunting grounds to the western wilds. Presents, which had been liberally made by the French, were entirely withheld by the English, or sparingly dealt out to them. In the meantime nothing was done to secure an agricultural population.

In 1763 Pontiac, an Ottawa chief, secured a confederation of many tribes, and made a well planned attempt to capture the military posts from Niagara to Chicago. The attack was to be made simultaneously, and British power to be destroyed in a single day. He personally undertook the capture of Detroit. The attack followed as planned, and nine of the twelve forts were taken. Detroit was saved, but Mackinaw was taken, with the massacre of the entire garrison, while only four were brought in as prisoners from St. Joseph. The preservation of Detroit was due to the timely warning given by an Indian woman, who informed Major Gladwin, commandant of the fort, that Pontiac, with sixty chiefs, would demand a council on the 7th of May, 1763, when they intended, at a given signal, to shoot down the officers, admit their followers, kill all Englishmen, and spare the French.

The attempt failed. Pontiac found the garrison ready for him and retired. Various stratagems were laid on following days, all of which failed. Foiled, Pontiac and his followers made an open attack, which was repulsed with the aid of two armed vessels in the river. But the post remained in a state of siege until August, when it was relieved by the arrival of General Bradstreet with a large force. During the winter of 1763, Sir William Johnson, at Niagara, succeeded in effecting reconciliation with several tribes, but Pontiac through 1764–5 remained an obdurate enemy, but finally consented to make peace.

In October, 1763, by royal proclamation, the purchase of any lands not ceded by the Indians to the government was strictly forbidden. It was not for the interest of Great Britain to foster the colonies so far as to build up manufactures. They must purchase from the mother country. With the entire control of the fur trade, cupidity opposed the felling of the forest. It must be reserved, that the animals whose abundance supplied the trade might not be driven out or destroyed. The British, like their predecessors, had no ambition or desire to see the country settled and improved.

The military policy of the Pontiac war was so far changed as in a

measure to secure the good will of the Indians. Detroit became the central point, from which war parties were sent out against the tribes still in sympathy with the French. The Governor-general of Canada had no interest and little knowledge of the colony. Sir Guy Carleton, who commanded at the commencement of the American Revolution, before the British Parliament in 1774, when asked whether both Detroit and Michigan were under his government replied, "Detroit is not under the government, but Michigan is."

The bulk of the population was French, and so continued until after 1820. Nothing occurred of importance for twenty years. A people with nothing to do; a garrison in idleness; a commandant with no interest outside of his military duties; this was the only history. The colony remained undisturbed through the American Revolution. It was distinguished as a military centre, and many hostile parties, composed of a small number of regulars, piloted large bodies of Indians to the banks of the Ohio river. With the commencement of the war Patrick Sinclair had been appointed Lieutenant Governor at Mackinaw, and Captain Henry Hamilton to the same position at Detroit. Millions of dollars in supplies were sent to both places for distribution among the Indians, and liberal bounties were paid for scalps. Among these supplies the tomahawk and scalping knife had a prominent place. During sixteen months the supplies were immense: 362,460 barrels of flour, 42,176 pounds of fresh beef, 16,473 pounds of salt beef, 19,756 pounds of butter, 203,932 pounds of salt pork, and 58½ tons of gunpowder were among the items received at Detroit. Of the result of such an order as "sixty gross of scalping knives," Governor Hamilton, in January, 1778, wrote to General Carleton that the Indians had brought in 23 prisoners and 129 scalps. In another letter of September, 1778, he says, "Since last May the Indians have taken 34 prisoners, 17 of which they delivered up, and 81 scalps."

The attacks on Wyoming, Boonesboro, and other points in Kentucky, and Pennsylvania, were participated in by soldiers and Indians from Detroit. Daniel Boone was among the prisoners taken and brought to Detroit. It is estimated that over three thousand persons were scalped or made prisoners by war parties sent from Detroit during the war. One of these expeditions, under Captain Bird, required $300,000 for an outfit. It penetrated into Kentucky and brought back the usual quota of scalps.

With the close of the war, by the final treaty of September 3, 1783, the American government understood that the territory south of the great lakes was conceded to them, and that all military posts were to be surrendered within five months. But no move was made in that direction, nor was any notice sent to commandants of military posts. President Washington sent Baron Steuben to take possession of Detroit, but Gen. Haldimand, at Quebec, refused him passports, and wrote that no orders had been received to deliver up the posts. In 1784 another attempt to gain possession was refused. John Adams, then minister to England, in 1786 made demand for the surrender of the forts, and was refused, on the ground that the States had failed to fulfill stipulations as to debts due to British subjects. In 1787 the military force was greatly increased at Detroit, two full regiments being stationed there.

Defensive works were erected, and every preparation made to resist a siege.

Thus encouraged the Indians increased in hostility, and many settlers were killed in the Northwest Territory, of which Michigan was a part. This resulted in sending out troops to subdue them, first under General Harmer, who was defeated, October 22, 1790, with the loss of 600 men. The scalps of these American soldiers were strung on poles and brought to Detroit. In 1791, Gen. St. Clair, with 1,400 troops, was defeated on the Wabash river. Government then attempted to make peace but found that the Indians would not consent to it unless their rights were conceded as extending to the Ohio river. It was finally determined to send Gen. Wayne with a sufficient force to secure a decisive victory. Nearly all the military force at Detroit was sent to resist him, on the Miami. On the 30th of August, 1794, the combined British and Indian forces were defeated in a hard fought battle.

In 1794 John Jay was sent to England to negotiate, and the Jay treaty was ratified by the President in 1795. It provided that on or before the first day of June, 1796, British garrisons should be withdrawn from all posts and places within the United States. Under this treaty an American force under Captain Porter took possession of Detroit, July 11, 1796. A garrison was soon after sent to Mackinaw, and Michigan was at last under the protection of the American flag. General Wayne and Winthrop Sargent soon after visited Detroit and received a cordial welcome.

MICHIGAN UNDER AMERICAN RULE.

From 1796 to 1805 Michigan was attached to other territories. On the fifteenth of August, 1796, Secretary Sargent, by proclamation, organized the county of Wayne. It included the lower, and a large portion of the upper peninsula, a large tract across the northern border of the present States of Ohio and Indiana, and a strip along the entire western shore of Lake Michigan, including the present sites of Chicago, Milwaukee, and Green Bay. In all this territory, over which so many times had swept the tide of war during the previous hundred years, the only land under cultivation was the narrow border extending from the river Raisin to Lake St. Clair. To this the Indian title had been secured in 1789 by Gov. Arthur St. Clair of the Northwest territory, it being described as "the part of Detroit with a district of land beginning at the mouth of the river Rosine, at the west end of Lake Erie, and running up the southern bank of said river six miles, thence northerly, and always six miles west of the strait, until it strikes the Lake St. Clair." It also secured the post at Mackinaw, and twelve miles square about it. The consideration was $6,000.

In 1795 General Wayne, by an Indian treaty made at Greenville, Ohio, secured the same territory in Michigan; also, the islands of Mackinaw and Bois Blanc, and a piece of land on the Straits of Mackinaw to measure six miles in length and three miles back from the straits between Lakes Huron and Michigan. Twelve tribes were represented by 1,113 Indians—the most prominent being the Wyandots, Delawares, Shawanese, Ottawas, Chippewas, and Pottawattomies.

In 1808 Governor Hull secured a tract of land running north from the mouth of Auglaize river until it intersects the latitude of the out-

let of Lake Huron, thence northeast to White Rock. The southern boundary was the Maumee river. This tract covered the land east of the present meridian line.

By the treaty made at Saginaw in 1819, Gen. Cass obtained in addition the strip "commencing six miles south of the base line on the boundary of 1808 treaty, thence west sixty miles, thence north in a direct line to the head of Thunder Bay river; thence down the same to the mouth." Gen. Cass, in his report of this acquisition, says: "A large portion of the country ceded is of the first character for soil and situation; it will vie with any land I have seen north of the Ohio river. The cession probably contains more than six million acres." The above were the principal cessions of land by the Indians up to the time they were thrown into market as public lands, which was in 1818.

Under the ordinance of 1787 whenever the Northwest Territory had 5,000 free white inhabitants, the people had a right to choose a Legislature who could elect a delegate to Congress. In 1798 Wayne county sent three delegates to the general assembly at Chilicothe, five hundred free white males being required for each delegate. The public expenses were defrayed by the issue of bills of credit.

SLAVES IN MICHIGAN.

The ordinance of 1787 had provided that "there shall be neither slavery nor involuntary servitude in the said territory, otherwise than in the punishment of crime, whereof the party shall have been duly convicted."

Under both French and English rule there had been a few slaves in Michigan. Some were brought in, but most of them were Indians purchased from the savages who had captured them, and held as household servants. Under Jay's treaty the right of ownership in both these classes was held to be good. There is no record to show the number. So far as the census returns indicate, from 1800 to 1830 there were very few slaves. None were returned in 1800, when Wayne county was attached to the Territory of Ohio. In 1810, Wayne county comprised the whole Territory of Michigan, and was divided into four civil districts. Twenty-four slaves were returned in all, of which seventeen were in the civil district of Detroit, four in Erie, two in Huron, and one in Mackinaw. In 1820 no slaves were returned. In 1830 thirty-two slaves were enumerated. Of these all but one were from territory now forming part of Wisconsin. One slave was returned from Oakland county, a female between the age of fourteen and twenty-four. With that census ended the record of slavery in Michigan.

1800 TO 1805.

In 1800 the Northwest Territory contained a population of 43,365. Wayne county, of which part was in the present States of Ohio and Indiana, returned 3,206 inhabitants. Detroit contained about three hundred houses. The only cultivated lands were contained in a strip three miles wide, bordering on Detroit river and the lakes, except a few hundred acres about Mackinaw. More than three-fourths of the total population were French, and Catholics in religion. Two-thirds were males. By the admission of Ohio as a State in 1803, and the organization of the

Territory of Indiana, Michigan became attached to that Territory. The union was brief. Congress organized the Territory of Michigan June 30, 1805. The Legislature of Ohio had granted a charter for the "Town of Detroit" in 1802. But there had been no perceptible increase in population during the nine years since the national government had assumed control of the Territory. Some French families had come in from Canada; others had gone out who preferred British rule. There was no opportunity to become landholders, while the merchants were sufficient for the trade.

MICHIGAN UNDER GOV. HULL.

President Jefferson appointed General Wm. Hull as Governor of the Territory, and he reached Detroit July 1, 1805. He was an officer of the Revolution, but at the age of fifty-two was entirely unfitted for the duties required on the western frontier. Stanley Griswold, from Connecticut, was the first Secretary. The Judges were Augustus B. Woodward and Frederick Bates, and John Griffin became a Judge in 1806. Griswold could not agree with Gov. Hull, and Reuben Atwater, of Vermont, succeeded him at the end of three years.

Just before the arrival of Gov. Hull the town of Detroit had been entirely consumed by fire. The court commenced its sittings under a "bower" erected for that purpose. A Territorial seal was adopted in 1805. The first grand jury presented the subject of public lands as requiring immediate attention.

LANDS AND TITLES.

The American State papers furnish voluminous evidence of the great obstacles to the settlement of Michigan from the impossibility of securing legal titles. Alexander Hamilton, Secretary of the Treasury, had as early as 1790 presented to Congress a plan for the disposition of the public lands. But nothing had been done in Michigan, and it was in response to this action of the grand jury that President Jefferson, in February, 1804, gave to Congress the report of C. Jouett, Indian agent at Detroit, of the situation of the titles and occupations of lands, private and public. He made a full report of over four hundred farms.

One hundred and twenty-one farms were located on the river Raisin, 23 on Otter Creek, 16 on Sandy creek, 16 on Ecorce or Bark river, 43 on the river Rouge, 10 on Grosse Isle, 23 on the banks of the Detroit river between the Rouge and Detroit, 60 between Detroit and Grosse Point, 24 from Grosse Point to Lake St. Clair, 30 on Milk river, a branch of the Huron, 34 on the river Huron, 12 at Point O' Tramble, six miles above the mouth of the St. Clair river, and, twelve miles above that point, 25 on the St. Clair river.

It was in 1806, before Congress began the consideration of land titles in Michigan. Judge Woodward made a report to the Secretary of the Treasury, which was laid before Congress. He stated that the amount of land in cultivation did not exceed 150,000 acres, or a little more than six townships, while he over-estimated the entire area at 76,000,000 acres, and the quantity of good land at only eighteen to twenty millions of acres. He describes the farms as from two to four acres front on the river, the houses about twenty-five rods apart; the people, "honest beyond comparison, generous, hospitable, and polished; they seek in the

duties of piety, and in the pleasures of sociability, an oblivion of all the cares of ambition and of avarice, as well as of science."

The lands claimed comprised several classes; those made by Governors of Canada and Louisiana and confirmed by the King of France; those made by Governors and not confirmed by the King; those made by military officers, without grant or confirmation, but accompanied by long and undisturbed possession; those with similar titles, and extinguishment of native titles while the territory belonged to Great Britain; and those occupied with extinguishment of native titles since the country came under the control of the United States.

He reported in all 442 farms, with dates of settlement running from 1763 to 1801. Nearly all of these were French claims, bordering on the rivers, with from two to five acres front and forty acres in depth. This was a French acre, less than four-fifths of an American acre. The largest purchase mentioned was that of Patrick Sinclair, on St. Clair river, comprising 4,000 acres, taken in 1765. Only six of these farms had good titles, as appears from the report made Dec. 1, 1806, by the Register of the Land Office at Detroit.

Thus, after the lapse of one hundred and five years since the settlement of Detroit, there were less than 4,000 acres of land to which there was a valid title. Commissioners, however, took the claims under consideration, and made full reports to government. In 1807, Congress passed an act confirming all grantees or heirs prior to July 1, 1796, in their titles, not to exceed 640 acres in each tract. A subsequent act confirmed the titles of settlers, outside of the vicinity of Detroit, who were in possession in 1812.

By Gov. Hull's treaty with the Indians in 1808, the territory as far west as the principal meridian line, running through the present counties of Hillsdale, Jackson, Ingham, and Shiawassee, to a point near Owosso, and thence northeast to White Rock, on Lake Huron, was secured to the government and ready for survey, but no survey was made, and no lands could be obtained. These surveys were not made from a constant fear of trouble with the Indians. Gov. Hull was infirm of purpose, and unpopular with the settlers. Owing to his representations the town of Detroit was stockaded in 1807, and from that time until after the close of the war in 1815, there was little disposition to clear and settle on lands except within hailing distance of Detroit.

The history of Michigan under the entire administration of Gov. Hull was one of bickerings between the judges. When they were not at enmity among themselves some of them were in opposition to the Governor. The whole civil and military power was in their hands; all laws were made and repealed by them. The Governor and judges in turn were presented before the grand jury. Each had his friends and sympathizers, who now and then came to blows.

In 1807 and 1808 it was evident that the Indians meant mischief. They had signed treaties ceding their lands without understanding them. It was for the interest of the Northwest Company that the country should remain a wilderness. Their agent at Malden was giving out guns and ammunition, and the British company distributed their annual presents with a lavish hand.

Under Tecumseh, a Shawnee chief, whose home was on the upper Wabash, a union of the tribes was gradually effected. In 1811 the

forces under Gen. Harrison defeated him at Tippecanoe, which secured the peace of that region for a short time. Gov. Hull was in Washington at the time of this battle to urge the government to take possession of the lakes with armed vessels. Practically his civil administration then ceased. War was declared against Great Britain, June 18, 1812. The news reached the British, at Malden, several days in advance of that furnished to Governor Hull, and resulted in the early fall of Mackinaw, which surrendered August 16, 1812.

By order of the President a regiment of regular troops and twelve hundred Ohio volunteers were placed under the command of Governor Hull. One of these Ohio regiments was under the command of Lewis Cass, his first appearance in the affairs of Michigan.

It is not the purpose of this sketch to give in full the details of the war of 1812, even as they relate to Michigan. General Hull, with his forces, arrived at Detroit, July 5, and took possession of the fort, which he disgracefully surrendered, without firing a gun in its defense, August 16, 1812. It was the surrender of a superior force within fortifications. The officers and men under Gen. Hull received the surrender with just indignation. With the fall of Detroit all Michigan passed into the hands of the British. From August 16, 1812, to September 28, 1813, Detroit was under British control. Mackinaw was not restored to our government until July 1, 1815.

The Indian atrocities of the war of the Revolution were repeated, and culminated in the Indian massacre at Frenchtown, of which a graphic account is given in Campbell's History of Michigan. It was the most atrocious act of the war. Of nine hundred soldiers only fifty escaped capture; more than four hundred were killed, and many others were scalped on their way to Malden. Testimony submitted by Judge Woodward to Congress proved that many of the dead bodies were literally devoured by dogs and hogs. The brutal Proctor, the British officer in command at Detroit, refused burial to these men, many of whom, wounded as they were, had been burned alive. The prisoners who reached Detroit were ransomed by the citizens, the price paid being from ten to eighty dollars. It was more than five months after the massacre before Proctor took any steps towards the ransom of prisoners, and then only five dollars were offered per man. Gen. Cass, in an article in the North American Review of April, 1827, conclusively proves that the British Government did not ransom a single prisoner during the entire war.

Not satisfied with allowing the Indians to capture and murder without restraint, Proctor banished the leading citizens of Detroit who had distinguished and impoverished themselves by the ransom of prisoners. No wonder that the brutality of Proctor called forth the denunciation of Edmund Burke in the British Parliament. With the victory of Commodore Perry the power of Great Britain in western Canada was broken, and Michigan was safe for the future.

MICHIGAN UNDER LEWIS CASS.

On the surrender of Detroit, Colonel Lewis Cass, with his regiment, had been left in charge of the post. His appointment soon after as Governor was the beginning of the future of Michigan. A native of New Hampshire, he had settled at Marietta, Ohio, at the age of sev-

enteen. After receiving a liberal education he had become a lawyer, had been a member of the Legislature, and Marshal of the State of Ohio. He had served with courage and success through the war. Above all, from habits and training, he was familiar with the needs of the people. No man in the Northwest was better qualified to deal with the Indian. Under him government acquired by various treaties all lands south of Grand river to the headwaters of Thunder Bay river, as well as such as were required to make the posts at Mackinaw and elsewhere safe for the future. By some of these treaties lands were exchanged for other lands west of the lakes.

MILITARY BOUNTY LANDS.

In 1812 Congress had appropriated two million acres to be selected in the Territory of Michigan as bounty lands to volunteers. At the close of the war the survey of these lands was ordered. Edward Tiffin was then Surveyor General, with his office at Chilicothe, Ohio. A party of surveyors were sent out who commenced in November, 1815, to run a line north, nearly upon the present meridian line. They pretended to go some fifty miles, sent back several discouraging reports, and, without orders, returned to Chilicothe. They were undoubtedly in fear of Indian attacks; suffered from cold weather; encountered more difficulties on the line than would have been found either east or west of it; and might have met with other and better inducements to make unfavorable reports.

At the close of the war 68,500 men were reported as entitled to 160 acres of land each, requiring 10,960,000 acres. Had these first lands been surveyed and selected in Michigan additional bounty lands would have been placed here.

Whether the selection of the lands would have increased the population with greater rapidity is not easy to determine. It is certainly the fact that up to October 1, 1821, only 71,975 acres of land had been sold in Michigan, while 2,396,160 acres had been surveyed, and the Indian title had been extinguished to 10,399,360 acres. In the same year, and at a date six months earlier, bounty warrants had issued for 967,500 acres, changed by Congress from Michigan to Illinois. The cause that led to this change came about through the following letter of Tiffin:

"SURVEYOR GENERAL'S OFFICE,
Chilicothe, Nov. 30, 1815.

"The surveyors who went to survey the military land in Michigan territory have been obliged to suspend their operations until the country shall be sufficiently frozen so as to bear man and beast. Knowing the desire of the government to have the lands surveyed as soon as practicable, and my earnest importunities to urge the work forward, they continued at work, suffering incredible hardships, until both men and beasts were literally worn down with extreme sufferings and fatigue. The frost set in early, and the ice covered nearly the whole country, but broke through at every step, and the pack horses could not be got along with them. They were, therefore, obliged to submit to the climate and its attendant rigors, and desist for awhile, intending to attack them again so soon as they it possible to proceed."

"I annex a description of the country which has been sent to me, and which I am informed all the surveyors concur in; it was only yesterday I received it and heard of their return. So soon as their health and strength is recruited I expect to see them all, only one of them having been here yet. In the meantime I think it my duty to give you the information, believing that it is the wish of the government that the soldiers should have (as the act of Congress expresses) lands fit

for cultivation, and that the whole of the two millions of acres appropriated in the territory of Michigan will not contain anything like one-hundredth part of that quantity or is worth the expense of surveying it. Perhaps you may think with me that it will be proper to make this representation to the President of the United States, and he may arrest all further proceedings by directing me to pay off what has been done and abandon the country."

"Congress being in session, other lands could be appropriated in lieu of these and might be surveyed as soon as those in Michigan: for when the ice is sufficiently strong to bear man and beast a deep snow would still embarrass the surveyors. I shall, therefore, wait to hear your answer to this communication before I proceed any further, thinking I should be unfaithful to my trust if I had lost any time in communicating the information received."

Description of the Military Lands in Michigan Territory.

"The country on the Indian boundary line, from the mouth of the great Auglaize river, and running thence for about fifty miles, is (with some few exceptions) low, wet land, with a thick growth of underbrush, intermixed with very bad marshes, but generally very heavily timbered with beech, cottonwood, oak, etc.; from thence, continuing north, and extending from the Indian boundary line eastward, the number and extent of the swamps increases, with the addition of numbers of lakes from twenty chains to two and three miles across: Many of the lakes have extensive marshes adjoining their margins, sometimes thickly covered with a species of pine called "tamirak," and other places covered with a coarse, high grass, and uniformly covered from six inches to three feet (and more at times) with water. The margins of the lakes are not the only places where swamps are found, for they are interspersed throughout the whole country, and filled with water as above stated, and varying in extent. The intermediate space between the swamps and lakes, which is probably near one-half of the country, is, with a very [few] exceptions, a poor, barren, sandy land, on which scarcely any vegetation grows except very small, scrubby oaks. In many places that part which may be called dry land is composed of little short sand hills, forming a kind of deep basin, the bottom of many of which are composed of a marsh similar to those above described. The streams are generally narrow, and very deep compared with their width, the shores and bottoms of which are (with a very few exceptions) swampy beyond description, and it is with the utmost difficulty that a place can be found over which horses can be conveyed. A circumstance peculiar to that country is exhibited in many of the marshes by their being thinly covered with a sward of grass, by walking on which evinced the existence of water or a very thin mud immediately under that thin covering, which sinks from six to eighteen inches from the pressure of the foot at every step and at the same time rising before and behind the person passing over. The margins of many of the lakes and streams are in a similar situation, and in many places are literally afloat. On approaching the eastern part of the military lands, towards the private claims in the straits and lakes, the country does not contain so many swamps and lakes, but the extreme sterility and barrenness of the soil continues the same. Taking the country altogether, so far as has been explored, and to all appearance, together with the information received concurring, the balance is as bad, there would not be more than one acre out of a hundred, if there would be one out of a thousand, that would, in any case, admit of cultivation.

"With great respect, I am your obedient servant,

EDWARD TIFFIN.

"The Hon. JOSIAH MEIGS, *Commissioner General Land Office, Washington.*"

Tiffin writes again to the Commissioner, under date of Dec. 11, 1815: "I am very anxious to hear from you since my representation of Michigan went on. Subsequent accounts confirm the statements, and make the country out worse (if possible) than I had represented it to be."

William H. Crawford, Secretary of War, under date of January 22, 1816, wrote to Commissioner Meigs, asking him to designate a tract of land from which these military bounty lands could be selected, and that officer recommended two millions of acres from the Illinois cession. February 6, 1816, President Madison, by special message to congress, asked the designation of other lands, as the lands in Michigan Territory "are so

covered with swamps and lakes, or otherwise unfit for cultivation, that a very inconsiderable proportion can be applied to the intended grants."

The change was made by congress, as requested. Michigan had no newspaper to meet the charges, while this opinion of Michigan had a wide circulation through the press of the eastern States.

At this time both the Land and Indian offices were connected with the War Department. Indian Agent Jouett had made a favorable report in 1803, of Michigan lands. There was on file a complete contradiction of the statements of Tiffin. Jouett said of the lands on the river Raisin: "An excellent soil, producing twenty-five to thirty bushels to the acre of wheat, or other grain in the same proportion. Their orchards are yet young, but promise in a few years to be very productive." Of the settlements on the Ecorce, "The country is level, the soil rich, and sufficiently dry for any kind of cultivation. The grass and wheat are astonishingly luxuriant, and nature requires to be but little aided to produce in abundance all the necessaries of life." Of farms on Lake St. Clair, "The soil is dark, rich and strong, and extremely favorable to the production of wheat." This report was full, explicit, and in direct contradiction to that of Tiffin.

But, whatever the result might have been had these military bounty lands been selected in Michigan, it is certain that these reports of Tiffin, and the action of congress, placed Michigan in a bad light in the East. This prejudice remained and in some quarters is not yet extinguished. To go to Michigan was to take leave of civilization and court an early death. For nearly three years it stopped all surveys of lands. It was only in 1818, more than two hundred years from the discovery of the Territory, and one hundred and seventeen years from the first settlement of Detroit, that the first acre of Michigan lands was offered for public sale. In the same year the first trip by steamer was made from Buffalo to Detroit. Within three years after more lands were sold than all that had been improved in the previous history of the Territory. In 1820 the minimum price of lands was reduced to one dollar and a quarter per acre. But it was not until 1830 that settlers had the pre-emption right to lands.

In 1818 the people refused to advance a grade in government and elect their own Legislators. The French were opposed to it, as it would have entailed an expense they did not feel able to bear. But in 1819 congress allowed the Territory a delegate in congress, and William Woodbridge, afterwards United States Senator, was elected.

The tide of emigration had commenced, and the census of 1820 proved that the population, which had remained almost stationary for half a century, had doubled since 1810. But the real advance commenced when the Erie canal was opened in 1825 and emigrants could reach Michigan by water from Albany. With the opening of lands to public sale came a demand for township and county organizations, of which Governor Cass was a warm advocate. Under the organic law this power was exercised by him. Wayne was the only county from 1796 to 1817. Monroe county was organized July 14, 1817; Macomb, January 15, 1818; and Michilimackinac, October 26, 1818. On the same day Brown and Crawford counties were organized, comprising the territory now in the State of Wisconsin. Oakland county was organized January 12, 1819, and St. Clair county in 1820. The counties of Lapeer, Sanilac, Saginaw, Shia-

wassee, Washtenaw, and Lenawee were laid out in 1822. The first township organization was that of Detroit in 1802. Mackinaw Island was organized as a township in 1817, and Monguagon, Wayne county, in 1818. In 1824 the government passed from the first to the second grade. Up to that year the people had no power. It was all vested in the Governor and Judges. They now elected eighteen persons, from which the President selected nine, to act as the Legislative Council. The first Council assembled in Detroit. In the first message of Governor Cass, of June 7, 1824, a full review was given of the previous history of Michigan. The reasons for its slow growth and settlement are fully set forth. He says:

"To those whose knowledge of the history of this country is confined to the early date of its final settlement, and who are ignorant of the series of adverse events which have checked its growth, it is matter of surprise that our population is yet so weak. But it should be recollected that under the French and British governments this was a remote portion of a remote colony, originally settled by adventurers in the fur trade. Agriculture and those arts which minister to it were neglected for a traffic of doubtful advantage. Although secured to the United States by the treaty of peace of 1783, still possession was not obtained till 1796. It then became a part of the immense Territorial Government northwest of the Ohio, but separated from the local seat of that government and from its principal offices by an extensive wilderness, in possession of its aboriginal inhabitants. It thus continued, with no identity of interest, and but little intercourse with the seat of Territorial power, until 1803, when the State of Ohio was formed. This country was then attached to the Territory of Indiana, from whose government and people it was still more remote. In 1805 this Territorial Government was organized, but the commencement of its operations was marked by a signal calamity. The town of Detroit, the mart of business, and in fact the only place of any importance, was utterly destroyed by one of the most awful conflagrations which has ever visited any section of the Union."

"About this period commenced a series of legislative measures on the part of the general government, for the examination and adjustment of land claims in the Territory. Not more than six tracts were held by legal titles; a striking proof of the little importance attached to this colony by both the parent countries. The tenure of lands depended upon improvement and possession, and the initiatory grants were made by subordinate officers. In many instances farms had thus descended in the families of the occupants for several generations. It became equally important to the people and to the future prosperity of the country, that these claims should be examined, and that all equitable interests, founded upon possession and improvement, should be confirmed by legal grants to the occupants. The wise and liberal policy of the general government led to the adoption of this measure, but its final execution was delayed by difficulties incident to the determination of such a complicated subject, until 1812."

"In 1807, that feverish excitement became visible among the Indians which terminated in open hostilities at the battle of Tippecanoe. During its progress and development, this frontier was subject to frequent alarms, and furnished no attraction for the peaceable and industrious emigrant, which could counterbalance the danger of an Indian war."

"The disastrous effects of the last war upon this Territory are recorded in the history of our country. The whole population was prostrated at the feet of relentless savages, and with such atrocious circumstances as have no parallel in the annals of modern warfare. Menaces, personal violence, imprisonment and deportation were indiscriminately used, as either appeared best calculated to effect the object: which avowedly was to sever our citizens from the allegiance they owed their country. Fortunately their patriotism and energy resisted these efforts, and probably in no portion of the union was more devotedness to the general cause manifested than here."

"This state of calamitous expense was terminated by the treaty of peace; but it was not till 1818 that any of the public lands were brought to market. From this period we may date the actual commencement of the settlement of the Territory. Prior to it these lands could not be purchased, and our fellow citizens in the older sections of the republic could have no motive to remove to a country, of which the National Government was, under such unfavorable circumstances, almost the only proprietor."

He might have well added to the above that from 1812 up to 1820 the cost of living was higher at Detroit than elsewhere in the Union. This was largely due to the fact that it was the central point for all the Indians of the Northwest. In a letter written to the War Department in 1821, Governor Cass says of the Indians, that his "family is driven from one extremity of the house to the other by them." It was estimated that four hundred Indians arrived at Detroit daily. They had to be fed and clothed. From 1813 Governor Cass had been *ex officio* superintendent of the Indian agency at Detroit, but also had under his control and reporting to him the agencies at Mackinaw, Green Bay, Chicago, Fort Wayne, Piqua, and the sub-agencies at Upper Sandusky and Blanchard's Fork. In the Detroit agency alone there were 8,000 Indians. The Indians from all these agencies took in Detroit at least once a year. During eight years he had disbursed over $400,000 among them, procured at banks in Ohio and brought at his own risk to Detroit. The risk was in transportation through an unsettled wilderness, and the danger of the failure of the banks upon which he drew before he could use the money. In that case the loss would have fallen upon him.

Colonel Hunt writes to the Secretary of War, October 21, 1821, that Detroit, since the war, had been "the dearest place in the United States. The average price of flour has been twelve dollars a barrel, pork thirty-five dollars a barrel, whisky two dollars per gallon, butter fifty cents per pound by the firkin, eggs fifty cents per dozen by the average, and frequently a dollar a dozen has been paid for them; three dollars for a turkey, wine eight dollars per gallon, corn two dollars per bushel, I have paid that price for 500 bushels at a time; oats 75 cents per bushel, hay thirty dollars per ton, loaf sugar 50 cents per pound, coffee 62½ cents per pound, hyson tea three dollars per pound, and every other article in proportion. The contract price of wood was, upon the average, five and a half dollars per cord."

Gen. Macomb, in a letter of October 6, 1821, says that he has often had to detail a guard of soldiers to protect the family of Governor Cass from the importunities of the Indians. He alludes to the controlling power exercised by Cass over all the tribes. "To bring about this happy and good understanding many feasts were given to the chiefs, and presents to their wives and children, from the hands of the Governor and his family," all of which entailed great expense. For all this labor and expense as Indian agent Governor Cass had received no compensation during all these years. He finally received $1,500 a year and ten rations per day, computed at twenty cents per ration.

From 1821 to 1825 the sales of land had exceeded 220,000 acres, and on the 30th of June, 1827, the total lands sold were 373,000 acres. Within six years more than six times the land had been sold and settled upon than in the entire previous history of the Territory. There was no longer a doubt of the future. The era of prosperity had commenced which would soon bring Michigan into the Union.

In 1821 all the territory west of that ceded by the Indians in 1819, and as far north as Grand river, was obtained by treaty. This gave full one-half of the Lower Peninsula to the government. The remainder of the Lower Peninsula, and so much of the Upper Peninsula as lies east of the Chocolate river was not obtained until 1836. In 1825 the Legis-

lative Council was increased from nine to thirteen members, to be selected from twenty-six by the President. In January, 1827, Congress allowed the people of the Territory to elect thirteen members who were to form the council, without the sanction of the President.

FROM 1830 TO 1837.

The United States census of 1830 gave the Territory a population of 31,639, while in 1820 it was only 8,896. Emigrants came in like a flood. The counties of Hillsdale, Branch, Berrien, Cass, Jackson, Calhoun, Van Buren, St. Joseph, Ingham and Eaton had been laid out prior to this census, and some of them organized. In 1831 Governor Cass was called to the cabinet of President Jackson, and resigned the position of Governor which he had so ably filled for eighteen years. The people began to talk of the coming State. The emigration to the Territory every year from 1830 to 1836 probably exceeded the total population in 1830.

The Black Hawk war, which broke out in 1832, and the cholera, which committed such fearful ravages from 1832 to 1834, delayed any attempt to form a State constitution. A census was ordered in 1834 which gave a population of 87,273 white inhabitants. Under the ordinance of 1787 Michigan was entitled to admission as a State when it numbered 60,000 free white inhabitants.

The Legislative Council, by an act passed January 26, 1835, authorized the people to elect on the coming 4th of April eighty-nine delegates who were to meet in Detroit on the second Monday of May, 1835. This convention adopted a State constitution and adjourned on the 24th of June. This constitution was adopted by the people, and State officers were elected on the first Monday of October, 1835.

As provided in the State constitution, the first Legislature met on the first Monday of November, 1835. On the tenth of November Lucius Lyon and John Norvell were elected United States Senators. After a short session, the Legislature adjourned until the first Monday of February, 1836, hoping that before that time Congress would admit the State into the Union. In this they were disappointed. It was not until June 15, 1836, that the bill passed Congress admitting the States of Arkansas and Michigan, but with the proviso that Michigan was not to be received unless it accepted the northern boundary of Ohio, as fixed by Congress. As a compensation for this loss of territory on the southern boundary Michigan was to receive territory in the Upper Peninsula, as far west as the Montreal river. On July 20, 1836, at a second adjourned session of the Legislature, the election of delegates to meet in convention was provided for to settle the question of admission.

This Convention met September 26, 1836, at Ann Arbor, and was composed of fifty delegates, of whom twenty-nine were from the counties of Wayne, Monroe, Lenawee, Oakland, Washtenaw and Livingston. They rejected the terms of admission proposed by Congress. The Democratic county committee of Wayne county issued a circular recommending another convention to be held at Ann Arbor, December 14, 1836. This convention was held, but there were no delegates from Monroe county. It accepted the prescribed conditions of admission, the validity of its action was recognized by Congress, and by an act approved January 26, 1837, Michigan was admitted as the twenty-sixth State of the Union.

This brief history of Michigan, prior to its admission as a State, car-

ries out the purpose contemplated. It seems eminently proper that the people, who are so proud of the State in this day of wealth, prosperity and progress, should review the early history of Michigan, and better understand some of the many obstacles that so long delayed the coming of the hardy pioneer.

RANK OF MICHIGAN AMONG THE STATES.

Through the census of 1880 alone can the standing of Michigan be compared with that of other States in the Union. It is an instructive and interesting feature of the census work, giving more correctly, than can be obtained from any other source, the ratio of progress in population, wealth, productions, manufacturing, and mining interests.

The following table gives the exact rank of the State as to other States, as well as the figures of 1880 with which to compare those of 1884:

	Rank.
Area in square miles, 58,915	11
Area of land surface, 57,430	11
Area of water surface, 1,485	12
Population, 1,636,937	9
Increase of population from 1870, 38.2 per cent	13
Density of population, 28.5 per square mile	17
Male population, 862,355	7
Female population, 774,582	12
Native-born population, 1,248,429	16
White native-born population, 1,228,127	10
Foreign-born population, 388,508	7
White population, 1,614,560	9
Colored population, 15,100	26
Indian population, 7,240	3
Chinese population, 27	22
Austrian born population, 1,025	13
Belgium born population, 979	5
Bohemian born population, 1,789	11
British American born population, 148,866	1
Danish born population, 3,513	7
French born population, 3,203	10
German born population, 89,085	7
English born population, 43,202	5
Irish born population, 43,413	11
Scotch born population, 10,731	5
Welsh born population, 830	14
Holland born population, 17,177	1
Italian born population, 505	12
Norwegian born population, 3,520	5
Hungarian born population, 193	12
Polish born population, 5,421	3
Russian born population, 1,560	5
Swedish born population, 9,412	7
Swiss born population, 2,474	13
National militia, (males between 18 and 45), 371,140	8
Males of voting age, (21 and over), 467,687	8

	Rank.
White males 21 years of age, 461,557	8
Native white males 21 years of age, 285,469	10
Teachers in schools, 8,608	8
Male teachers in schools, 2,496	16
Female teachers in schools, 6,098	8
Pupils attending schools, 362,459	8
Average daily attendance at schools, 263,775	6
Number of school-houses, 6,412	8
Number of sittings in schools, 446,310	5
Value of school property, $8,982,344	8
Outlay for school purposes, $3,112,468	8
Persons over 10 years of age, 1,236,686	8
Persons over 10 unable to read, 47,112	7
Persons over 10 unable to write, 63,723	5
Male persons over 10 years of age, 659,101	8
Female persons over 10 years of age, 577,585	8
Total engaged in occupations, 569,204	8
Male persons engaged in occupations, 514,191	8
Female persons engaged in occupations, 55,013	18
Total engaged in agricultural occupations, 240,319	17
Male persons engaged in agricultural occupations, 239,346	16
Female persons engaged in agricultural occupations, 973	22
Total engaged in professional and personal services, 143,249	8
Male persons engaged in professional and personal services, 103,244	5
Female persons engaged in professional and personal services, 40,005	10
Persons engaged in trade and transportation, 54,723	9
Males engaged in trade and transportation, 53,217	9
Females engaged in trade and transportation, 1,406	9
Persons engaged in manufactories, and mechanical and mining industries, 130,913	7
Males engaged in manufactories, and mechanical and mining industries, 118,284	7
Females engaged in manufactories, and mechanical and mining industries, 12,629	12
Males, 10 to 15, engaged in occupations, 11,610	21
Females, 10 to 15, engaged in occupations, 3,479	22
Males, 16 to 59, engaged in occupations, 470,903	8
Females, 16 to 59, engaged in occupations, 50,725	16
Males 60 and over engaged in occupations, 31,678	9
Females 60 and over engaged in occupations, 809	22
Number of agricultural laborers, 70,845	19
Number of farmers, 167,141	10
Clerks, salesmen and accountants, 12,580	8
Number of families, 336,973	8
Average number in a family, 4.86	30
Persons to a square mile, 28.50	21
Families to a square mile, 5.87	19
Dwellings to a square mile, 5.60	18
Number of dwellings, 321,514	7
Persons to a dwelling, 5.09	34
Acres to a person, 22.45	18

	Rank.
Acres to a family, 109.07	21
Gross value of farms, $499,103,181	7
Value of live stock on farms, $55,720,113	10
Value of farm implements and machinery, $19,419,360	7
Value of productions, $91,159,858	8
Number of pounds of butter made, 38,821,890	6
Number of pounds of wool, 11,858,497	3
Grain of all kinds—bushels, 88,097,084	11
Bushels of corn, 32,461,452	12
Bushels of wheat, 35,532,543	4
Bushels of oats, 18,190,793	9
Bushels of barley, 1,204,316	9
Bushels of rye, 294,918	15
Bushels of buckwheat, 413,062	4
Bushels of Irish potatoes, 10,924,111	4
Pounds of hops, 266,010	4
Horses, 378,778	10
Working oxen, 40,393	9
Milch cows, 384,578	11
Other cattle, 466,660	13
Sheep, 2,189,389	4
Swine, 964,071	18
Acres of improved land, 8,304,028	15
Number of farms, 154,008	11
Farms of 20 and under 50 acres, 45,029	3
Farms of 50 and under 100 acres, 55,777	8
Farms of 20 and under 50 acres occupied by owners, 41,286	1
Farms of 50 and under 100 acres occupied by owners, 50,365	4
Valuation of real estate, $432,861,884	9
Valuation of personal estate, $84,804,475	17
Real and personal estate, $517,666,359	10
Total State taxation, $1,683,560	8
Total county taxation, $1,804,512	12
Taxation of civil divisions less than counties, $5,139,877	10
Total taxation, $8,627,949	11
Number of manufacturing establishments, 8,873	7
Capital employed, $92,930,959	8
Wages paid to employés, $25,318,682	8
Value of raw materials, $92,852,969	10
Value of product, $150,692,025	9
Value of copper mined, $7,979,232	1
Amount ingots of copper, 45,830,262	1
Value iron ore raised, $6,034,648	1
Number tons iron ore, 1,837,712	1
Total value of non-precious minerals, $14,279,437	2
Number of bushels of salt made, 12,425,885	1
Value of same, $2,271,913	1
Value of lumber, $52,449,928	1
Steam and water-power employed in manufactories, number of horse-power, 164,747	5
Annual mortality	7

	Rank.
Number of daily newspapers, 33	9
Average daily circulation, 62,839	9

COMPARATIVE DEDUCTIONS.

There are many striking comparative deductions to be made from the foregoing table in favor of Michigan. The first, perhaps of all, is that it is the first State for small farms from 20 to 50 acres. In the actual number it is exceeded by Illinois and Ohio. But the total number of farms in each of those States greatly exceeds those of Michigan, Illinois having 255,741 and Ohio 247,189; so that, in proportion to the whole number, Michigan stands first in these farms, and, of those occupied by owners, is numerically first. Of farms from 50 to 100 acres Michigan is eighth, in those occupied by owners fourth, being outnumbered in New York, Pennsylvania, and Ohio. As to farms from 20 to 100 acres, she holds the first rank, in proportion to population, of any State.

In male population she ranks seventh, leading Massachusetts and Kentucky, with a greater population.

FOREIGN-BORN POPULATION.

In foreign-born population Michigan has more than Missouri and Kentucky, each with greater population. Of this element Michigan has more from British America and Holland than any other State. The immigrants from British America numbered 148,866. In Massachusetts there were 119,302, and in New York 84,182. In no other State or Territory did it reach 38,000. Of Hollanders Michigan has 17,177, and the next largest number was in New York, 8,399. Only the States of Illinois, Massachusetts, New York, and Pennsylvania have a larger English or Scotch population. Illinois and New York only have a larger Polish population. Four States, Illinois, Wisconsin, Kansas, and Minnesota, have a larger Norwegian population. Only six States, New York, Illinois, Ohio, Wisconsin, Pennsylvania, and Missouri, have more Germans than Michigan. The States with a larger foreign population are New York, Pennsylvania, Illinois, Massachusetts, Wisconsin, and Ohio. The Canadian population alone is more than one-third of the entire foreign population, its excess being largely due to the lumber interest.

INSANE, IDIOTIC, BLIND, AND DEAF.

In 1880 Michigan reported 2,796 insane, 2,180 idiots, 1,289 blind, and 1,166 dumb.

Of insane there were more in New York, Pennsylvania, Ohio, Illinois, Massachusetts, Indiana, and Wisconsin. There were 12 less in Kentucky. Of idiots, New York, Pennsylvania, Ohio, Illinois, Indiana, Missouri, Kentucky, Georgia, Alabama, Iowa, North Carolina, Virginia, Tennessee, and Texas had more than Michigan, and Massachusetts had less; while of blind all these States had more than Michigan. Of deaf mutes seven States had more than Michigan; Massachusetts, with a larger population, having less.

EDUCATION.

Michigan is the eighth State in rank in schools, teachers, and pupils. The rank is sixth in pupils attending schools, and fifth in the number of school sittings.

ILLITERACY.

Of persons over 10, unable to read, there were 47,112. The States ranking above Michigan, in their order, were Iowa, Nebraska, Maine, Ohio, Kansas and Minnesota. Of persons over 10, unable to write, Michigan had 58,932, being outranked by the States of Nebraska, Iowa, Maine, and New Hampshire.

HEALTHFULNESS.

Michigan stands high as a healthy State. Only six States had less deaths in proportion to their population, being, in their order, Oregon, Minnesota, Nevada, Florida, Iowa, and West Virginia. Michigan has held the same rank for forty years.

NEWSPAPERS AND PERIODICALS.

The total number of newspapers and periodicals in Michigan in 1880 was 464. Michigan ranked eighth among the States. The States above her in rank were New York, with 1,411; Illinois, 1,017; Pennsylvania, 973; Ohio, 774; Iowa, 569; Missouri, 520; Indiana, 467. Of these States Iowa had less population than Michigan, Massachusetts with 427, and Kentucky with 205, had each a larger population than Michigan.

In this State there were 33 dailies, 397 weeklies, 3 semi-weeklies, 2 bi-weeklies, 19 monthlies, 4 semi-monthlies, 1 bi-monthly, 1 quarterly and 1 semi-annual. The circulation of dailies was 62,839; of all others 558,135. Michigan was ninth in rank of circulation.

In language, 439 were English, 2 French, 15 German, 6 Dutch and 2 Danish and Scandinavian. Devoted to politics, 413; to religion, 11; to agriculture, 5; commerce and trade, 3; general literature, 1; medicine and surgery, 7; science and mechanics, 2; temperance and secret societies, 5; education, 9; children, 4; miscellaneous, 4. Of the religious papers there were Baptist, 1; Methodist, 2; Reformed, 2; Catholic, 2; Second Advent, 3, and Unitarian, 1.

THE LUMBER INTEREST.

Lumber is the great manufacturing interest of Michigan, and the annual value of the product is more than one-fifth of that of the whole Union as shown by the following comparison:

	United States.	Michigan.
Number of establishments	25,708	1,649
Capital employed	$181,186,122	$39,260,428
Hands employed	141,989	22,875
Children and youth	5,967	1,360
Annual wages paid	$31,845,974	$6,967,905
Value of logs	$139,836,869	$30,819,003
Value mill supplies	$6,318,516	$1,432,369

	United States.	Michigan.
Value all materials	$146,155,385	$32,251,372
Lumber sawed (board measure)	18,091,356,000	4,172,572,000
Laths	1,761,788,000	461,805,000
Shingles	5,555,046,000	2,584,717,000
Staves	1,248,226,000	199,821,000
Sets of headings	146,523,000	21,897,000
Spool and bobbin stock	34,076,000	6,038,000
Value all other products	$2,682,668	$531,406
Total value all products	$233,268,729	$52,449,928

Except Michigan only five States manufactured lumber to the value of $10,000,000. They were Pennsylvania, $22,457,359; Wisconsin, $17,952,347; New York, $14,356,910; Indiana, $14,260,830; Ohio, $13,864,460.

FLOURING AND GRIST MILLS.

The flour interest is second only to lumber in amount and value in Michigan. There were 706 mills, with a capital of $7,704,464; employing 2,254 men, with an annual product valued at $23,546,875. The States exceeding Michigan in the value of the product were New York, Illinois, Pennsylvania, Minnesota, Ohio, Missouri, Indiana, and Wisconsin.

VALUE OF FARMS.

Michigan is the seventh State in the value of farms and farming implements, following behind Ohio, New York, Pennsylvania, Illinois, Indiana, and Iowa, the last State having a little less population, but all the others a far greater population. It is a significant fact that the United States census returns the total value of farms in Michigan at $499,103,181, while the assessed valuation of all real estate only foots at $432,861,844.

LIVE STOCK.

Michigan is the tenth State in the value of live stock. All the States with greater population, except Kentucky, lead Michigan, while this State falls behind Kansas and Texas with less population.

AGRICULTURAL PRODUCTIONS.

In the staple agricultural productions, Michigan has a rank far above her population. In wheat, with a yield in 1879 of 35,532,543 bushels, the only States producing more were Illinois, Indiana, and Ohio. In production to acres sown Michigan outranked these States. In oats and barley she ranked ninth, and in buckwheat fourth, following behind New York, Pennsylvania, and New Jersey. The bushels for each inhabitant were of corn 19, wheat 21.70, oats 11.11, barley .73. Of all kinds of grain the bushels to the inhabitant were 52.82, and to the rural inhabitant 68.63. It was the fourth State in the production of potatoes, following New York, Pennsylvania, and Ohio, but in proportion to population was the first. In orchard products it was the fifth State in the value, and first in proportion to population. It was the fourth State in hops, and the sixth in butter.

SHEEP AND WOOL.

The States of California, Ohio, and Texas alone have more sheep than Michigan, and only the States of California and Ohio produced more pounds of wool. In 1870 Michigan was the fourth State in the production of wool, the same in 1860, and the ninth in 1850. Since 1850 she has passed the States of Pennsylvania, New York, Vermont, Virginia, Illinois, Indiana and Kentucky, and has only been passed by California and Texas in the wool product.

AGRICULTURAL IMPLEMENTS.

Michigan was the fifth State in the number of establishments engaged in the manufacture of agricultural implements with 143 establishments. New York had 265, Pennsylvania, 220, Illinois, 220, and Ohio, 156.

SHIP BUILDING.

Michigan was first in the value of ship building of all interior States, and was only exceeded in the Union by Pennsylvania, New York, Delaware, Massachusetts and Maine. The value of vessels built in this State was $2,034,636.

STEAM AND WATER POWER.

Michigan was the fifth State in the power applied to manufactories. The total steam and water power was 164,747 horse power, an increase of 55.64 per cent from 1870. Water represented only 34,365 horse power. States leading Michigan were Pennsylvania, New York, Massachusetts and Ohio.

THE SALT INTEREST.

Michigan was the first State in the salt manufacture. Her product of 12,425,885 bushels in 1879 was valued at $2,271,913. Other States producing more than 1,000,000 bushels were New York with 8,748,203 bushels; West Virginia with 2,679,438 bushels, and Ohio with 2,650,301 bushels. The value of Michigan salt was more than double that of any other State.

COPPER AND IRON.

The copper produced in Michigan mines in amount and value, as shown by the United States census of 1880, was greatly in excess of that of all other States. The total for the United States was 56,920,266 pounds, of which Michigan produced 45,830,262 pounds. The value of the entire product was $8,886,295, of which Michigan is credited with $7,979,232. In iron ore Michigan also stands first in the amount and value of the product, with 1,837,712 tons valued at $6,034,648. Pennsylvania follows with 1,820,561 tons of ore valued at $4,318,999. New York, New Jersey and Missouri were the other States, whose production exceeded $1,000,000 each in value.

STATE DEBT.

Michigan, Illinois and Nevada, were the only States in 1880 reported

as either out of debt or with a sinking fund sufficient to meet it when due.

DENSITY OF POPULATION.

The settled area of Michigan was reported in 1880 at 47,230 square miles. Taking out of the estimate all cities of 8,000 inhabitants or over, and there were from two to six inhabitants on 9,800 square miles; six to eighteen on 8,200 square miles; eighteen to forty-five on 12,600 square miles; and forty-five to ninety on 16,630 square miles.

For the whole State, cities included, the population was 28.5 to the square mile. In 1870 it was 20.6; in 1860 it was 13; in 1850 it was 6.9; and in 1840 it was 3.7.

DISTRIBUTION OF POPULATION.

Of the total population, 1,493,764 were living at an elevation of between 500 and 1,000 feet above the sea-level; 117,351 between 1,000 and 1,500 feet; and 25,822 above 1,500 feet. In relation to temperature, 56,560 lived where the mean annual temperature was below 40 degrees; 175,099 where it was from 40 to 45 degrees; 1,405,278 where it ranged from 45 to 50. In accordance with the mean temperature of July, 525,885 lived on the range between 65 and 70 degrees, and 1,111,052 between 70 and 75 degrees. As to the mean temperature of January, 45,477 lived where it ranged from 10 to 15 degrees; 73,563 between 15 and 20 degrees; 1,484,444 between 20 and 25 degrees; and 33,453 between 25 and 30 degrees. As to maximum temperature, 1,223,431 lived where the extreme was between 95 and 100 degrees, and 413,506 where the range was from 100 to 105. At minimum temperature 48,955 lived where it fell to 35 and 40 below zero; 32,053 from 30 to 35 below; 275,838 from 25 to 30 below; 964,875 from 20 to 25 below; and 315,216 from 15 to 20 below.

In the distribution of population in accordance with the annual rainfall, 44,688 inhabitants lived where the annual rainfall was from 20 to 25 inches; 685,664 where it was from 30 to 35 inches; 401,781 where it was from 35 to 40 inches; and 504,804 where it was from 40 to 45 inches. As to the spring and summer rainfall, 37,799 inhabitants had from 10 to 15 inches; 1,052,896 from 15 to 20 inches; and 546,242 from 20 to 25 inches. The majority of the inhabitants of Michigan have less annual rainfall than those of Ohio, Indiana, and Illinois, but have more than Wisconsin, Minnesota, Kansas and Nebraska. In spring and summer rainfall the amount is greater in Ohio, Indiana, Illinois, Iowa and Missouri, and more than Wisconsin, Minnesota, Nebraska and Kansas. Michigan has less drouth than any State west of Lake Huron on the Northern border.

Native population of Michigan in 1880, distributed according to State or Territory of their birth:

State.	Population.	State.	Population.
Alabama	231	Delaware	642
Arkansas	95	Florida	64
California	397	Georgia	213
Colorado	90	Illinois	9,699
Connecticut	6,333	Indiana	18,216

State.	Population.	State.	Population.
Iowa	2,682	Pennsylvania	36,064
Kansas	892	Rhode Island	974
Kentucky	1,732	South Carolina	213
Louisiana	259	Tennessee	764
Maine	5,079	Texas	237
Maryland	1,433	Vermont	12,588
Massachusetts	9,591	Virginia	3,069
Michigan	803,306	West Virginia	272
Minnesota	859	Wisconsin	10,775
Mississippi	243	Arizona	3
Missouri	1,416	Dakota	56
Nebraska	294	District of Columbia	215
Nevada	28	Indian Territory	52
New Hampshire	3,300	Montana	16
New Jersey	7,903	New Mexico	175
New York	229,657	Utah	70
North Carolina	1,040	Washington	66
Ohio	77,053	Wyoming	17
Oregon	44	At sea	12
Total			1,248,429

NATIVE AND FOREIGN.

In 1880 Michigan had of native born population	1,248,429
Foreign-born population	388,508
Total	1,636,937
Number of foreign-born to 10,000 natives	3,112
In 1870:	
Native poulation	916,049
Foreign-born population	268,010
Total	1,184,059
Number of foreign to 10,000 natives	2,926
In 1860:	
Native population	600,020
Foreign-born population	149,093
Total	749,113
Foreign-born to 10,000 natives	2,485
In 1850:	
Native population	341,656
Foreign-born population	54,703
Total	396,359
Number of foreign-born to 10,000 natives	1,601

RANK IN POPULATION.

The rank of Michigan in population by the United States census at different decades is as follows:

In 1810	24	In 1850	20
1820	26	1860	16
1830	26	1870	13
1840	23	1880	9

In 1810 she stood twenty-fourth, lowest in rank of all the States and territories.

In 1820 she was still the lowest in rank.

In 1830 her rank was 26, having passed Arkansas.

In 1840 her rank was 23, the States and territories below her in order being Rhode Island, Arkansas, Delaware, Florida and Iowa.

In 1850 the rank was twenty, and the States below her in order were Connecticut, New Hampshire, Vermont, Wisconsin, Texas, Arkansas, Iowa, Rhode Island, California, Delaware, and Florida.

In 1860 her rank was sixteen, having passed in this decade the States of Louisiana, South Carolina, Maryland, Maine, and New Jersey, and been passed by Wisconsin.

In 1870 her rank was thirteen, having passed the States of North Carolina, Alabama, Wisconsin, and Mississippi, and been passed by the State of Iowa.

In 1880 her rank was nine, having passed the States of Iowa, Tennessee, Georgia, and Virginia.

MALE AND FEMALE.

In 1880 the male population of Michigan was	862,355
the female population of Michigan was	774,582
Number of females to 10,000 males was	8,982
In 1870 the male population was	617,745
the female population was	566,314
Number of females to 10,000 males was	9,167
In 1860 the male population was	394,694
the female population was	354,419
Number of females to 10,000 males was	8,980
In 1850 the male population was	209,896
the female population was	187,758
Number of females to 10,000 males was	8,945
In 1840 the male population was	113,788
the female population was	98,479
Number of females to 10,000 males was	8,656

WHITE AND COLORED.

In 1880 the proportion of colored population to 10,000 whites was	94
1870 " " " " " " " " " "	102
1860 " " " " " " " " " "	94
1850 " " " " " " " " " "	65
1840 " " " " " " " " " "	33
1830 " " " " " " " " " "	93
1820 " " " " " " " " " "	203
1810 " " " " " " " " " "	312

It will be seen by the above that the proportion of colored to white population is less than one-third of what it was in 1810, only one per cent more than in 1830, and that the decrease has been large since 1870.

RURAL AND URBAN POPULATION.

In 1880 Michigan had 27 cities each with a population in excess of 4,000. Six States only had a larger number, namely: New York, 58; Massachusetts, 57; Pennsylvania, 56; Ohio, 46; Illinois, 38; and New Jersey, 27. The other States with twenty cities or more were: Indiana, 27; Connecticut, 26; and Wisconsin, 20.

The total urban population of the United States at various periods is shown by the following table:

Date.	Population of United States.	No. of Cities.	Population of Cities.	Per Cent. to Total Population.
1790	3,929,214	6	131,472	3.3
1800	5,308,483	6	210,873	3.9
1810	7,239,881	11	356,920	4.9
1820	9,633,822	13	475,135	4.9
1830	12,866,020	26	864,509	6.7
1840	17,069,453	44	1,453,994	8.5
1850	23,191,876	85	2,897,586	12.5
1860	31,443,321	141	5,072,256	16.1
1870	38,558,371	226	8,071,875	20.9
1880	50,155,783	286	11,318,547	22.5

TERRITORIAL AND STATE CENSUS LAWS.

The first census of any kind in Michigan was a school census, under an act of the Territorial Legislature of Feb. 26, 1809. The overseers of the poor in each judicial district were made trustees of the school districts, and were required to lay out the districts and on the first Monday of May in each year to make a return of the whole number of children between 4 and 18 years of age in each school district. Upon this return an appropriation, not more than four nor less than two dollars, was to be raised for each school child to go to the several school districts, provided schools were kept therein.

The first act for a complete census of the territory of Michigan was approved April 2, 1827. It required the assessors of the several townships of the territory "to take a census or enumeration of the inhabitants of their proper townships, distinguishing the males from the females, and distinguishing males over 21 years of age and males under that age, and colored persons." It was to be taken on the first Monday of June, 1827, "by actual inquiry at every dwelling house or of the head of every family." The schedule provided, gave name of township, heads of families, white males over 21 years, white males under 21 years, white females, and colored persons. The territory then covered all belonging to the United States east of the Mississippi river and north of Illinois, Indiana, and Ohio.

The second territorial census was provided for by an act approved Sept. 6, 1834. It required a census of the territory *east* of the Mississippi river, to be taken by "the sheriffs of the several counties." It was to

include all inhabitants on the second Monday of October, 1834. All persons were included except Indians not taxed, and it required the ages of free white males and females by periods of five years up to twenty years of age, and above twenty years, by periods of ten years, up to one hundred years, and all over one hundred years. It was to give the number of free white persons, deaf and dumb, or blind, to distinguish the sexes of all free colored persons, and of all other colored persons "bound to serve for life and for a term of years."

At this time, and on the same day of the passage of the act, another law was approved, dividing into two counties the territory *west* of the Mississippi river attached to the territory of Michigan by Congress, to wit: "the territory of the United States west of the Mississippi river and north of the State of Missouri." This territory, now the State of Iowa, was divided into the counties of Dubuque and Demoine.

The first constitution of Michigan, adopted in 1835, section three, article four, directs that "The Legislature shall provide by law for an enumeration of the inhabitants of this State in the years 1837, 1845, and every ten years after the last mentioned time."

Under the above provision the Legislature, in 1837, passed an act requiring "an enumeration of all the inhabitants (excepting Indians not taxed) residing therein on the second Monday of October, 1837." It provided for taking "the names of all the males over 21 years, the number of males and females, the number of deaf and dumb persons, those under 10 years of age, those of 10 and under 21, those of 21 and under 45, those of 45 and under 75, and those over 75, and the number of all colored persons; also, of all grist and saw-mills, all carding machines and cloth dressing shops, glass manufactures, paper-mills, distillers, and merchants." The census was taken by collectors of townships.

The act for the taking of a census in 1845 provided for the appointment of a marshal in each county, and was to be taken on the first Monday of September, 1845. All the inhabitants (excepting Indians not taxed) residing therein were to be taken, with the names of all males over twenty-one years of age. The list was to distinguish males and females; those under ten; ten and under twenty-one; twenty-one and under forty-five; forty-five and under seventy-five; those over seventy-five; and also the number of deaf and dumb, the number of insane, and the number of all colored persons.

The State constitution of 1850 provided for a census in 1854, and every ten years thereafter. In 1853 the Legislature provided for the taking of the census by the supervisors of townships and assessors of districts. An enumeration of the inhabitants was to be taken (except "uncivilized Indians belonging to some tribe.") The names of all males at the age of 21 years and under 45 (designating the married from the unmarried); 45 and under 75; 75 and under 90; 90 and under 100; over 100 years of age. Females of 18 and under 40 (designating the married from the unmarried); 40 and under 75; 75 and over; children under 5; 5 and under 10 (designating the males from the females); the males of 10 and under 21; females of 10 and under 18; the number of colored persons; blind; deaf and dumb; insane and idiots; the number of marriages and deaths the preceding year; and the occupation and profession of all males

over 21 years of age. To these were added fifty-five additional items of statistics. The census was to be taken between the first Monday of April and third Monday of May. The census of 1864 was taken under this act of 1853.

The Legislature of 1873, Act 101, amended the law of 1853, and increased the statistics outside of those relating to population by adding a large number of items. Those relating to population remained the same as in 1854 and 1864.

In 1883 the Legislature passed a new act, under which this census was taken. This act is very full and complete. It probably covers more ground than has hitherto been attempted in any other State.

CENSUS LAW.

[No. 146. An act to provide for taking the census and statistics of this State.]

Appointment of census enumerators, assistants, etc.

Removal.

Proviso.

Further proviso in reference to appointments.

Duties and liabilities of enumerators.

SECTION 1. *The People of the State of Michigan enact*, That after the annual township meeting, and on or before the first Monday of May, in the year eighteen hundred and eighty-four, the township board of each organized township in this State, and the common council of each incorporated city shall appoint one census enumerator, and such number of assistants as may be necessary for each assessment district in such township or city. It shall also be the duty of each township board and common council to remove, for cause, any enumerator so appointed, and to forthwith fill any vacancy that may occur in the office of census enmerator: *Provided*, That no member of a township board shall be ineligible to the office of census enumerator by reason of being a member of such board: *Provided further*, That in case the township board of any township, or the common council of any city shall fail to appoint enumerators, as required by this section, it shall be the duty of the Governor, when notified of such failure, to appoint enumerators for such township or city. The enumerators so appointed shall file the oath of office, perform the same duties, be subject to the same penalties, and receive the same compensation as enumerators appointed by township boards and common councils.

Oath to be taken and filed, etc.

SEC. 2. That the census enumerators and assistants, so appointed, shall within five days after such appointment, take and subscribe the constitutional oath of office, and file the same, if a township enumerator, with the township clerk, and if a city enumerator, with the city clerk, and it shall be the duty of the township and city clerks, immediately after the filing of such oaths, to transmit the names and postoffice addresses of the persons so appointed and qualifying, to the clerks of their respective counties.

List, etc., of enumerators to be sent to Secretary of State.

SEC. 3. That the clerk of each county shall, as soon as practicable, and before the twentieth day of May, transmit to the Secretary of State a list of the names and postoffice addresses of all census enumerators, in their respective counties.

When census shall be taken, etc.

SEC. 4. That the census enumerators shall take the census and statistics required by this act, as of date June one, eighteen hundred and eighty-four. They shall commence the enumeration on the first day of June immediately following their appointment, and each enumerator shall prosecute the canvass of his township or census district from that date forward on each week-day without intermission, except for sickness or other urgent cause; and any unnecessary cessation of his work shall be sufficient ground for his removal and the appointment of another person in his place, and any person so appointed shall take the oath required of enumerators, and shall receive compensation at the same rates. And it shall be the duty of each enumerator to complete the census and statistics of his township or census district on or before the thirteenth day of June.

Duties of enumerators in taking census, etc.

SEC. 5. That it shall be duty of each census enumerator, after qualifying in the manner required by this act, to visit personally, within the time specified in this act, each dwelling-house in his township or

census district, and each family therein, and each individual living out of a family in any place of abode and by inquiry made of the head of such family, or of the member thereof deemed most credible and worthy of trust, or of such individual living out of a family, to obtain each and every item of information, and all the particulars required by this act. And in case no person shall be found at the usual place of abode of such family, or individual living out of a family, competent to answer the inquiries made in compliance with the requirements of this act, then it shall be lawful for the enumerator to obtain the required information, as nearly as may be practicable, from any reliable source: *Provided*, That Indians not taxed shall be omitted from the enumeration: *And provided further*, That the census of each village shall be taken separately from that of the township in which such village is located. Proviso

Enumerators to notify clerks of completion of schedules.

SEC. 6. That it shall further be the duty of each census enumerator, immediately after completing the canvass of his township or district, to notify the township clerk or city clerk, as may be proper, that he has completed the census schedules of his township or district. Upon receiving such notice it shall be the duty of the township clerk to call a meeting of the township board, and of the city clerk to call a meeting of the board of review, provided by law for the assessment district constituting such census district; and, unless such meeting is held at an earlier date, it shall be held on the first week day in July, eighteen hundred and eighty-four, and due notice thereof shall be given by the said township and city clerks. At such meeting the census enumerator shall submit to such board census schedule number one, and the said board, together with the enumerator, shall proceed to examine such schedule, for the purpose of correcting the enumeration, by striking out or adding the designation of persons improperly enumerated or omitted; but no change shall be made in such schedule, except by the census enumerator, and by him only upon evidence, satisfactory to himself, that such change is necessary to the accuracy of such schedule, and for the purpose of securing such evidence, he may swear and examine witnesses, who shall testify subject to the pains and penalties of perjury: *Provided*, That if the census enumerator shall refuse to make any change deemed necessary, and demanded by the said board, then it shall be the duty of said board to make a certified statement of the change demanded by them, with the reasons therefor, which statement shall be attached to and returned with such schedule, by the census enumerator, and the census enumerator shall also attach to such schedule a certified statement of his reasons for not complying with the demand of the board. Immediately on the receipt by the Secretary of State of such schedule, with statements attached, he shall carefully examine such statements, and if, in his opinion, the change demanded is of sufficient importance, he shall submit the matter to the Governor, who may order a new enumeration, or make other any order in the matter he may deem just and proper: *Provided*, That in case the Governor shall order a new enumeration, it shall be taken as of the date of June one, eighteen hundred and eighty-four.

Clerk to call meeting of township board, etc.

When meeting to be held.

Board and enumerator to make corrections, etc.

By whom changes made.

Proviso.

When new enumeration may be orderd, etc.

Proviso.

Census schedules to be returned to county clerks, etc.

SEC. 7. It shall be the duty of each census enumerator, immediately after the examination provided for in the preceding section, to return the original census schedules, duly certified, to the county clerk of his county, as his returns, under the provisions of this act. And it shall be the duty of the county clerk, after satisfying himself that they are properly made out, and duly certified, to forward them to the Secretary of State, on or before the tenth day of July: *Provided*, That if at that date the schedules of any township, or census district, have not been received by such county clerk, he shall forward the same as soon as they are received.

Proviso.

Compensation and fees of enumerator.

SEC. 8. That each census enumerator shall receive, as full compensation for services performed under this act, two dollars and fifty cents per day of ten hours, for the time he is actually and necessarily engaged in canvassing his township, or census district; two dollars and fifty cents per day for the review of schedule number one, provided for in section six of this act; ten cents per mile for going to the office of the county clerk, to obtain the necessary blank schedules, and ten cents per mile for conveying the returns to the office of the county clerk; and the sum due

County clerk to certify amount due, etc.

each enumerator shall be calculated at the rate aforesaid, by the county clerk to which the returns are made, and his certificate of the amount due shall be paid by the county treasurer: *Provided*, That before the county clerk shall give to any enumerator a certificate of amount due, such enumerator shall attach a certificate, signed by him, to each schedule of said returns, in the following form, to wit: "I do hereby certify that the census and statistics set forth in the schedules hereunto annexed, have been made out, in every respect, in conformity with the provisions of the act for taking the census, and statistics, of this State, for the year eighteen hundred and eighty-four, and they are complete, and accurate, according to my best knowledge and belief." The census enumerator shall also file with the county clerk, a certified statement of the number of days actually and necessarily engaged in canvassing his township, or census district, and in the review of schedule number one, provided for in section six of this act. The township board, and members of the board, or boards of review in cities, for services performed in compliance with the requirements of section six of this act, shall be entitled to the same compensation, and to be paid in the same manner, as the members of the board of review of assessments.

Proviso.

Certificate of enumerator.

Certificate of time spent, to be filed, etc.

Compensation of members of boards.

Schedules to be numbered.

SEC. 9. That the census schedules shall be numbered one, two, three, and four. *Schedule number one* shall contain inquiries as to the name, age at last birthday, sex, and color; as to the profession, occupation, or trade; as to the occupation of fathers of children under fifteen years of age; as to the place of birth, as to the [and] place of birth of parents, as to the month of birth, if born within the preceding year, and the number of children previously born of the same mother; as to the civil condition whether single, married, widowed, or divorced; as to the month and place of marriage, if married within the preceding year; as to the ability to read and write; as to the physical condition, whether insane, epileptic, idiotic, deaf and dumb, or blind; and as to the time of residence within this State of each and every inhabitant of each township and census district, on the first day of June of the year eighteen hundred and eighty-four. Schedule number one shall also designate the heads husband and wife) of each family, and shall contain inquiries as to the relation of each person enumerated to the heads (husband and wife) of the family,—whether son, daughter, servant, boarder, or other; also inquiries as to the whole number of marriages; and, by sex, the whole number of births and the whole number of deaths occurring during the preceding year.

What schedule number one to contain.

Schedule number two shall contain inquiries as to the name, age at last birthday, sex, and color; as to the profession, occupation, or trade; as to the occupation of fathers of persons under fifteen years of age, deceased; as to the place of birth, and place of birth of parents; as to the month of birth, if born within the preceding year; as to the civil conditions at time of death, whether single, married, widowed, or divorced; as to the month and place of marriage, if married within the preceding year; as to the physical condition, whether insane, epileptic, idiotic, deaf and dumb, or blind: as to the month of death, disease or other cause of death, the place where such death occurred, and time of residence within this State of each and every inhabitant whose death occurred during the preceding year.

What schedule number two to contain.

Schedule number three shall contain inquiries as to the number, size, improvements, and value of farms; as to the wages paid farm help; as to the acreage and yield of the various farm products, and as to the number of pounds of butter and cheese made by farmers during the preceding year; as to the number of pounds of maple sugar made the present year; as to the number of each kind of live stock on hand, the value of live stock, and as to the acreage of growing crops.

What schedule number three to contain.

Schedule number four shall contain inquiries as to the *name* of each corporation, company, or individual owning or operating each establishment of productive industry, including mines and fisheries, in which the value of the products amounts to two hundred dollars or over; as to the *name* of the business, manufacture, or product, and the *capital*, both real and personal, invested in the business: as to the *kind of power used*, and the kind and number of machines used: as to the *average* number of hands and the [number of] children or youth employed: as to the *sex* of the hands employed; as to the total amount paid in *wages* and the number of *months* in operation the preceding year; as to the kind, quantity, and value of materials, and as to the kind, quantity, and value of productions

What schedule number four to contain.

the preceding year. The Secretary of State may, in his discretion, add to the census schedules inquiries of special importance, not named in this section.

Term preceding year.

SEC. 10. That the term "preceding year," wherever used in this act, shall be construed to mean the year ending June first, eighteen hundred and eighty-four.

Penalty for neglect of duty, etc., by enumerators.

SEC. 11. That any enumerator who, having taken and subscribed the oath required by this act, shall without justifiable cause, neglect or refuse to perform any of the duties enjoined on him by this act, within the time limited by this act, or shall communicate to any person not authorized to receive the same, any statistics of property or business included in his return, shall be guilty of a misdemeanor, and upon conviction thereof, shall forfeit a sum not exceeding three hundred dollars, or be imprisoned in the county jail not exceeding thirty days, or both such fine and imprisonment in the discretion of the court; or if he shall willfully and knowingly make false certificates or fictitious returns, he shall be deemed guilty of a misdemeanor, and upon conviction forfeit and pay a sum not exceeding five hundred dollars and be imprisoned not exceeding two years.

Duty of members of township board, etc., to notify prosecuting attorney of offenses under this act.

SEC. 12. That it shall be the duty of the township board of any township and of each member thereof, and of the common council of any incorporated city, and of each member thereof, having knowledge of any violation of the provisions of the foregoing section by any enumerator appointed by such township board or common council, to at once notify the prosecuting attorney of the county where the offense occurred. And in case the offense consists in the failure of an enumerator to make his returns to the county clerk in proper form, duly certified and within the time prescribed by this act, then it shall be the duty of such clerk to notify the prosecuting attorney of his county.

Penalty for refusal of persons to furnish information to enumerator when requested.

SEC. 13. That each and every person more than eighteen years of age, belong to any family residing in any township, or census district, and in case of the absence of the heads and other members of any such family, then any agent of such family shall be, and each of them hereby is required, when thereto requested by the census enumerator, to render a true account to the best of his or her knowledge, of every person belonging to such family; and whoever shall willfully fail or refuse shall be guilty of a misdemeanor, and upon conviction thereof shall forfeit and pay a sum of fifty dollars, or be confined in the county jail not more than six months. And every owner, lessee, agent, or manager in charge of any establishment of productive industry, or farm, and every president, treasurer, secretary, general agent, or managing director of every corporation owning or operating any such establishment or farm, who shall, when thereto requested by the census enumerator, willfully neglect or refuse to give true and complete answers to any inquiries authorized by this act, shall forfeit and pay a sum not less than five hundred, nor more than five thousand dollars, and in addition shall be guilty of a misdemeanor, and on conviction thereof shall be imprisoned in the county jail for a term not exceeding one year. And it shall be the duty of the census enumerator to promptly notify the prosecuting attorney of his county of any penalty incurred in his township or census district, under the provisions of this section.

Enforcement of fines and penalties.

SEC. 14. That all fines and penalties imposed by this act may be enforced by appropriate action at law in any court of competent jurisdiction in the county where such offenses shall have been committed or forfeitures incurred, and all forfeitures, when recovered, shall be for the use of such county.

Duty of prosecuting attorney in case of offenses, etc.

SEC. 15. That it shall be the duty of the prosecuting attorney of each county, when notified of any forfeiture or penalty incurred under the provisions of this act, to immediately commence suit against the parties offending, and prosecute the same to a final termination.

Schedules, pamphlets, etc., to be prepared by Secretary of State and forwarded to county clerks.

SEC. 16. That the Secretary of State shall prepare the blank schedules required by this act, and shall transmit to the several county clerks of the State a sufficient number for each township or census district in each county, on or before the first day of January, of the year one thousand eight hundred and eighty-four; the Secretary of State shall also prepare a pamphlet of instructions, including a copy of this act, for taking the census and statistics, and transmit *to the several* county clerks a suffi-

cient number of copies of the same to supply each census enumerator with one copy; and it shall be the duty of each county clerk to receive such schedules and pamphlets in his office, and on or before the twentieth day of May next thereafter cause to be delivered to the census enumerator of each township and census district in his county, one copy of the pamphlet of instructions, and a sufficient number of the several census schedules to take the census and statistics of his township or census district.

County clerk to deliver same to enumerator.

Secretary of State to publish census, etc., and distribute same.

SEC. 17. That it shall further be the duty of the Secretary of State to condense and arrange in proper form for publication, the census and statistics of this State, taken in pursuance of the provisions of this act, and when so condensed and arranged he shall cause two thousand four hundred copies to be printed and bound, and shall distribute the same to the officers, boards of officers and others entitled to the joint documents of this State. He shall also cause a sufficient number of copies to be printed and bound to supply crop correspondents and census enumerators with one copy each, and one thousand copies to be deposited in the office of the Secretary of State to supply future demands.

Appointment, etc., of enumerators in unorganized territory, etc.

SEC. 18. That it shall be the duty of the Governor to appoint enumerators to take the census in unorganized territory not legally attached to any organized township or census district for the purpose of assessment. The enumerators so appointed shall make their returns to the county clerk of the organized county to which such unorganized territory is attached for judicial purposes, and the sum due such enumerator shall be calculated by the county clerk and paid by the county treasurer of such organized county, according to the provisions of section eight of this act.

When census returns are lost, destroyed, etc.

SEC. 19. That in case the census returns of any township or census district are by any means lost or destroyed, the Governor shall, on proper evidence being furnished by the Secretary of State, at once order a new enumeration, which enumeration shall be taken as of the date of June first, one thousand eight hundred and eighty-four.

Acts repealed.

SEC. 20. All acts and parts of acts inconsistent with the provisions of this act are hereby repealed.

Taking of subsequent censuses.

SEC. 21. That censuses, subsequent to that of eighteen hundred and eighty-four, shall be taken pursuant to the provisions of this act.

Approved June 5, 1883.

NATIONAL CENSUS OF 1800.

In 1800 Michigan was a part of the Northwest Territory, and was entirely in the county of Wayne, which had been organized in 1796, by proclamation of Winthrop Sargent, Secretary of the Territory. It included a portion of northern Ohio and Indiana. The total population of the Northwest Territory was 45,365. This was all in the counties of Hamilton, Adams, Jefferson, Ross, Trumbull, Washington and Wayne. The population of Wayne, of which nine-tenths was in Michigan, was 3,206. It was made up as follows:

	Free White Males.	Free White Females.
Under 10 years of age	540	467
10 and under 16	201	193
16 and under 26	332	252
26 and under 45	584	198
45 and upwards	198	102

All other free persons except Indians not taxed, 139.

One-third of the whole population resided at Detroit, and at least another third were within ten miles of that city. Most of the balance were settled on the River Raisin, and on Stony Creek, in Monroe county.

NATIONAL CENSUS OF 1810.

	Males.	Females.	Free Blacks.	Slaves.	Total.
Under 10 years of age, . . .	800	640	....	....	.....
10 years and under 16.....	351	332	....	....	.....
16 years and under 26,.....	583	368	....	....	.....
26 years and under 45	763	311	....	....	.....
45 years and upwards	340	130	....	....	.....
	....	....	120	24	.....
	2,837	1,781	120	24	4,762

This census was taken by civil districts, of which Wayne county was divided into four. These had population as follows:

Detroit.....	2,227	Huron.....	580
Erie.....	1,340	Michilimackinac.....	615

This return was made by Reuben Atwater, Secretary of the Territory.

NATIONAL CENSUS OF 1820.

The census of 1820 gave Michigan a total population of 8,896.

Free Whites.	Males.	Females.
Under 10 years of age.....	1,220	1,130
Of 10 and under 16.....	559	525
Of 16 and under 26.....	1,334	692
Of 26 and under 45.....	1,661	595
Of 45 and upwards.....	609	266
Colored.		
Under 14 years of age.....	35	20
14 and under 26.....	32	20
26 and under 45.....	27	16
45 and upwards	11	13
Totals.....	5,488	3,277

In addition there were 131 other free persons, not taxed. This return was made by Thomas Rowley, Marshal of the Territory.

At this census the territory was comprised in seven counties and the city of Detroit, among which the population was divided as follows:

Wayne.....	2,152	Michilimackinac.....	819
City of Detroit.....	1,422	Brown.....	952
Macomb.....	898	Crawford.....	492
Oakland.....	330	Monroe.....	1,831

Of the above counties, Brown and Crawford were entirely in the present State of Wisconsin, as was also a large part of Michilimackinac. The population of Brown and Crawford was 1,444.

TERRITORIAL CENSUS OF 1827.

This census was taken, but the record of it in full can not be found. Governor Cass, in 1829, recommended the taking of a census, but the

committee of the legislative council, to whom the subject was referred, reported that it was not expedient, as a census had been lately taken, and one would be taken by the United States in 1830. It also appears from the Legislative Journal that the counties of St. Clair and Crawford were not returned in 1827. The only portion of it to be found is the report of the city of Detroit. The return of that city by B. F. H. Witherell, assistant marshal, gives a total population of 2,152. There were 380 names returned in the list of "heads of families." The name of Lewis Cass heads the list with seventeen in his household. Among the names are those of General Macomb, John L. Lieb, Louis Moran, Chapaton, Campau, St. Aubin, Brevoort, Peltier, Rivard, Meldrum, Godfroy, Deguindre, Abbott, Palmer, Wing, and many others, well known in the early history of the State. Of the whole number over two hundred are French, a clear proof that as late as 1827 about two-thirds of the people were French. Nearly all the large families are those with French names. The number of persons engaged in agriculture was 451; in manufactures, 46; in commerce, 5. There were 66 free colored persons, and 39 foreigners not naturalized.

NATIONAL CENSUS OF 1830.

The federal census of 1830 gave the territory of Michigan a total population of 31,639, against 8,896 in 1820, a large increase. The whole number of males was 18,350; of females, 13,289. The preponderance of males between 20 and 40 is particularly noticeable; 7,128 to 3,939 females. Of the 32 slaves returned, 23 were in the county of Iowa, 6 in Crawford, 2 in Brown, and one, a female between 10 and 24, in Oakland county. Only one slave was returned from territory now in Michigan. The return, with ages and sex, is as follows:

	Males.	Females.
Under 5 years of age	3,023	2,743
5 and under 10	2,326	2,066
10 and under 15	1,905	1,686
15 and under 20	1,543	1,438
20 and under 30	4,389	2,540
30 and under 40	2,739	1,399
40 and under 50	1,232	726
50 and under 60	658	390
60 and under 70	264	140
70 and under 80	64	35
80 and under 90	20	10
90 and under 100	4	5
100 and upwards	1	..

Slaves 32, of which 23 were males and 9 females. Free colored persons 261, of which 159 were males and 102 females.

Three thousand six hundred and thirty-five inhabitants were enumerated in counties now in Wisconsin, leaving the actual population of territory now in Michigan, 28,004. Returns were made from sixteen counties and the city of Detroit:

Wayne	6,781	Chippewa	626	Van Buren	5
Monroe	3,187	Crawford	692	Berrien	325
Oakland	4,911	Washtenaw	4,042	Mackinaw	877
Lenawee	1,491	St. Joseph	1,313	Brown	1,356
Macomb	2,413	Cass	919	Iowa	1,587
St. Clair	1,114				

The city of Detroit had 2,222 inhabitants. Returns were not made by townships in Wayne, Monroe, Oakland, Lenawee and Mackinaw. In Washtenaw county the names of towns making returns were given, but not the population. The towns were Ypsilanti, Ann Arbor, Dexter, Saline, and Panama. Nineteen townships made separate returns, to wit: In Macomb county: Clinton 482, Harrison 427, Shelby 441, Washington 899, Ray 164. In St. Clair county: Clay 240, Cottrelville 226, St. Clair 272, Desmond 376. In St. Joseph county: Brady 391, Green and Flowerfield 110, Sherman 205, White Pigeon 607. In Cass county: Ontwa 229, Penn 199, La Grange 260, Pokagon, 231. In Berrien county: Niles 325.

There were 1,497 aliens. Fifteen persons were deaf and dumb, and five blind. The census was taken and returned by John L. Lieb, Marshal of the Territory.

TERRITORIAL CENSUS OF 1834.

The Territorial Census of 1834 was taken on the second Monday of October, 1834. The total population of the Territory now included in the State was 87,273.

At this time the Indian population of the Territory was estimated at 7,914. Of these 5,347 were Chippewas, residing in the Upper, and upper part of the Lower Peninsula; Ottawas, 1,983, living in Lower Peninsula; Menominees, 454, in Upper Peninsula; Pottawattomies, 100, on St. Joseph River; and Wyandottes, 30, near Detroit.

	White Males.	White Females.	Free Blacks.	Total.
Under 10	15,308	14,164	74	29,546
10 and under 16	5,437	5,042	85	10,564
16 and under 26	7,546	7,354	76	14,976
26 and under 45	16,471	11,583	40	28,094
45 and upwards	2,868	1,211	19	4,098
Totals	47,630	39,354	294	87,278

There were also three slaves not included in the above enumeration.

Sixteen counties reported as follows:

Wayne	16,638	Monroe	8,542	Washtenaw	14,920
St. Clair	2,244	St. Joseph	3,168	Cass	3,280
Branch	764	Jackson	1,865	Lenawee	1,911
Calhoun	1,714	Macomb	6,055	Chippewa	526
Oakland	13,844	Mackinac	891	Berrien	1,787
Kalamazoo	3,124				

The original returns of above census are not to be found in the office

of the Secretary of State. They are taken from the Gazetteer of Michigan, by John T. Blois, published in 1838. The total population is five more than appears in the act of the Legislative Council, approved January 26, 1835. The figures also agree with those published in the Detroit *Almanac and Michigan Register* for 1838, published by Burger & Stevens, at Detroit.

STATE CENSUS OF 1837.

The first State census was taken in October, 1837. The original returns of this census are not in the office of the Secretary of State, but the figures are taken from the Legislative Manual of 1838. It is given in full by townships and counties:

ALLEGAN COUNTY.

Township.	Population.	Township.	Population.	Township.	Population.
Allegan	621	Newark	190	Otsego	341
Plainfield	317				
Total					1,469

BARRY COUNTY.

All the population, 512, is returned in the township of Barry.

BERRIEN COUNTY.

Bainbridge	99	New Buffalo	199	Royalton	175
Berrien	496	Niles	1,497	St. Joseph	599
Bertrand	1,262	Oronoko	248	Weesaw	116
Buchanan	172				
Total					4,863

BRANCH COUNTY.

Batavia	357	Girard	448	Quincy	569
Bronson	635	Gilead	184	Sherwood	217
Coldwater	960	Ovid	209	Union	260
Elizabeth	177				
Total					4,016

CALHOUN COUNTY.

Albion	773	Eckford	530	Milton	1,632
Athens	288	Homer	1,019	Sheridan	353
Burlington	378	Marengo	737	Tekonsha	278
Convis	170	Marshall	1,801		
Total					7,959

CASS COUNTY.

Calvin	201	Mason	224	Porter	442
Howard	366	Ontwa	1,012	Silver Creek	108
Jefferson	395	Penn	693	Volinia	427
La Grange	699	Pokagon	506	Wayne	223
Total					5,296

CHIPPEWA COUNTY.

Population, 366. All returned in Ste Marie.

CLINTON COUNTY.

Population, 529. Returned together in the towns of DeWitt and Watertown.

EATON COUNTY.

Bellevue	438	Eaton	330	Vermontville	145
Total					913

GENESEE COUNTY.

Argentine	434	Grand Blanc	691	Vienna	107
Flint	1,288	Mundy	234		
Total					2,754

HILLSDALE COUNTY.

Adams	279	Litchfield	314	Scipio	469
Allen	353	Moscow	496	Somerset	441
Fayette	685	Pittsford	550	Wheatland	729
Florida	156	Reading	277		
Total					4,749

INGHAM COUNTY.

Population, 822. Returned together in Aurelius, Ingham, and Stockbridge.

IONIA COUNTY.

Ionia	511	Maple	517
Total			1,028

JACKSON COUNTY.

Population, 8,702. Returned together in the towns of Concord, East Portage, Grass Lake, Hanover, Jackson, Leoni, Liberty, Napoleon, Parma, Rives, Sandstone, Spring Arbor, and West Portage.

KALAMAZOO COUNTY.

Brady	1,292	Kalamazoo	1,373	Prairie Ronde	665
Comstock	1,383	Pavilion	548	Richland	720
Cooper	386				
Total					6,367

KENT COUNTY.

Kent	1,660	Byron	362	(part of the town in Ottawa county.)	
Total					2,022

LAPEER COUNTY.

Population, 2,602, as returned together in Atlas, Bristol, Hadley, Lapeer, and Lomond. Richfield was not returned, but was estimated at 211, making the total population of the county 2,813.

LENAWEE COUNTY.

Blissfield	559	Lenawee	1,151	Raisin	1,076
Cambridge	523	Logan	1,962	Rollin	508
Dover	680	Macon	1,111	Rome	826
Fairfield	203	Medina	420	Seneca	431
Franklin	989	Ogden	198	Tecumseh	2,464
Hudson	328	Palmyra	898	Woodstock	541
Total					14,868

LIVINGSTON COUNTY.

Byron	317	Hamburg	490	Marion	202

Total					175,025

Totals of counties and State agree with footing of townships as published in manual.

In Lanman's History of Michigan, pages 293 and 294, a table of the productions of Michigan for 1837, is printed, for which credit is given to official returns in the office of the Secretary of State. The totals of this table give the following items: Number of grist mills, 114; of saw mills, 433; card machines, 23; cloth dressing shops, 12; distilleries, 16; merchants, 795. Bushels of wheat, 1,014,896; rye, 21,944; corn, 791,427; oats, 1,116,910; buckwheat, 64,022; flax, 43,826; pounds of hemp, 524; head of neat stock, 89,610; horses, 14,059; sheep, 22,684; hogs, 109,096.

NATIONAL CENSUS OF 1840.

The Federal Census of 1840 gave Michigan 212,267 inhabitants. The returns by ages were as follows.

White.	Males.	Females.
Under 5 years of age	19,484	18,401
5 and under 10	16,054	15,089
10 and under 15	12,839	11,798
15 and under 20	10,887	10,819
20 and under 30	22,759	18,706
30 and under 40	16,025	11,864
40 and under 50	8,276	6,109
50 and under 60	4,442	3,394
60 and under 70	1,903	1,441

Total					212,267

Ninety-nine persons were engaged in mining, 56,521 in agriculture, 728 in commerce, 6,890 in manufactures and trades, 24 in navigating the ocean, 166 in navigating lakes and rivers, and 904 in the learned professions. There were 33 deaf and dumb persons, 29 blind, 69 idiots and insane. Number of persons reported as unable to read and write, 2,173. Five colleges were reported with 158 students, 12 grammar schools with 485 students, and 975 primary or common schools with 29,701 scholars. There were 998 school children being educated at public charge. There were 90 Revolutionary pensioners.

The number of horses and mules was 30,144; neat cattle, 185,190; sheep, 99,618; swine, 295,890. The statistics of agricultural products returned in bushels as follows: Wheat, 2,157,108; rye, 34,236; corn, 2,277,039; oats, 2,114,051; barley, 127,802; potatoes, 2,109,205. Pounds of wool, 153,375. Tons of hay, 130,805; of flax, 755¼. Value of orchard products, $16,075; of dairy products, $301,052. Value of home made manufactures, $113,055. There were 93 flouring mills with a product of 202,880 barrels of flour; grist mills, 99; saw mills, 491, with an annual product $392,345. The number of employés in flour, grist, and saw mills, 1,144. Capital invested in all kinds of manufactures, $3,112,240. Printing offices, 28, with 6 daily and 26 weekly newspapers, and 1 periodical. Binderies, 2. Capital invested in printing and binding, $62,900; men employed in printing and binding, 119. There were 26 commission houses, capital $177,500; other stores 612, capital $2,228,998. Annual product of maple sugar, 1,329,784 pounds. During the previous year 39 brick and 1,280 wood houses were built in the State, valued at $571,005, giving employment to 1,978 men.

STATE CENSUS OF 1845.

The original returns of this census are not on file in the office of the Secretary of State. The returns published herewith are taken from the Legislative Manual of 1846, the total of counties being the actual footing of the townships as printed:

Allegan	3,006	Lapeer	5,314

The native population was 341,591; the foreign-born, 54,852. Michigan was the birthplace of 140,648; New York, of 133,756; Ohio, of 14,677; Vermont, of 11,113; British America, of 14,008; England, of 10,620; Ireland, of 13,430; and Germany, of 10,070. No other State or country is credited with 10,000. There were 72,611 families, and 71,616 dwellings. There were returned as deaf and dumb, 125; blind, 125; insane, 133; idiotic, 189. There were three colleges, with 22 teachers and 308 students; 2,714 public schools, with 3,231 teachers, and 110,455 pupils; and 37 academies, with 71 teachers, and 1,619 pupils. There were 8,281 adults reported as unable to read and write.

The total number reported in various occupations was 108,978. Of this number 65,709 were farmers, 13,743 laborers, 4,153 carpenters, 2,020 blacksmiths, 1,716 cordwainers, 1,580 merchants, 1,441 coopers, and 1,406 clerks. In all other occupations the number was less than a thousand each.

Of farms, 1,929,110 acres were reported as improved, 2,454,780 as unimproved, and the total cash value at $51,872,446. The value of farming implements and machinery was $2,891,371. The number of horses was 58,506, asses and mules 70, milch cows 99,676, working oxen 55,350, other cattle 119,471, sheep 746,435, swine 205,847, with a total value of $8,008,734. The value of slaughtered animals was $1,328,327. Products were wheat, 4,925,888 bushels; rye, 105,871 bushels; corn, 5,641,420 bushels; oats, 2,866,056 bushels; barley, 75,249 bushels; buckwheat, 472,917 bushels; peas and beans, 74,254 bushels; Irish potatoes, 2,359,897 bushels; sweet potatoes, 1,177 bushels. Pounds of wool, 2,043,283; tobacco, 1,245. Value of orchard products, $132,650. Gallons of wine, 1,654. Value of products of market gardens, $14,738. Butter, 7,065,878 pounds; cheese, 1,011,492 pounds. Tons of hay, 404,934. Clover seed, 16,989 bushels; other grass seeds, 9,285 bushels. Hops, 10,663 pounds; flax, 7,152 pounds; silk cocoons, 108 pounds; beeswax and honey, 359,232 pounds; maple sugar, 2,439,794 pounds; molasses, 19,823 gallons. Value of home manufactures, $340,947.

The number of newspapers and periodicals was 58, of which 39 were political, 13 literary and miscellaneous, 3 religious, 2 scientific, and 1 neutral or independent. There were three dailies with an annual circulation of 1,252,000 copies; 2 tri and semi-weeklies, with 52,000; 47 weeklies, with 1,685,736; 3 semi-monthlies, with 134,400, and 3 monthlies with 123,600 copies. Public libraries 280, with 65,116 volumes; 119 school libraries, with 31,427 volumes; 15 Sunday school libraries (only three counties made returns), with 3,500 volumes; 3 college libraries, with 7,900 volumes; total 417 libraries, with 107,943 volumes. Of churches there were 66 Baptist, 2 Christian, 29 Congregational, 10 Dutch Reformed, 25 Episcopal, 1 Free, 7 Friends, 12 Lutheran, 119 Methodist, 1 Moravian, 72 Presbyterian, 44 Roman Catholic, 3 Union, 7 Universalist and 1 minor sect. Total, 399 churches, valued at $723,600, with 120,117 sittings.

There were 1,963 manufacturing establishments in the State, with a capital of $6,534,250; using raw material valued at $6,105,561; employing 8,930 men and 360 women; paying annually $2,387,928 wages; with an annual production of $10,976,894 in value, and a profit of 38.01 per cent. There were 198 flouring mills, with an invested capital of $1,740,050; producing 784,684 barrels of flour, valued at $3,031,976. There were 485 saw mills, with a capital of $1,688,186; producing 310,157,500 feet of lumber, valued at $2,221,798. Among other interests were 63 foundries, 2 blast furnaces, 15 woolen mills, 1 plaster mill, and 29 distilleries and breweries. There were 24 copper mines, producing 1,507 tons, valued at $386,960.

The average wages paid to a farm hand, with board, was $12 per month; to a day laborer, with board, 66 cents per day; to a day laborer, without board, 88 cents per day; day wages to a carpenter, without board, $1.40; wages by the week to a female domestic, with board, $1.10; board per week to laboring men, $1.59.

STATE CENSUS OF 1854.

The population of Michigan in 1854 was 507,521, divided as to age and sex as follows:

	Males.	Females.
Under 5 years	42,203	38,714
5 and under 10	39,343	36,032
10 and under 18	.....	47,425
10 and under 21	61,736	.....
18 and under 40	.....	83,786
21 and under 45	92,764	.....
40 and under 75	.....	32,494
45 and under 75	30,096	.....

75 and under 90	1,251	.....
90 and under 100	71	.....
100 and over	8	.....
Totals	267,472	240,049

Males, 266,350; females, 238,878; blind, 176; deaf and dumb, 206; insane and idiotic, 428; colored persons, 3,336; males married, 86,717; unmarried, 66,472. Females married, 86,150; unmarried, 54,156.

Acres of improved land, 2,111,660. Acres of wheat, 473,571, producing 7,027,932 bushels; acres of corn, 327,356, producing 7,630,658 bushels; all other kinds of grain, 2,294,420 bushels; potatoes, 2,917,434 bushels; tons of hay, 496,041; pounds of wool, 2,680,747; of pork, 11,258,841; of butter, 7,924,896; of cheese, 779,530; of maple sugar, 1,611,462.

Of live stock there were horses over 1 year old, 91,564; neat cattle over 1 year old, other than oxen and cows, 141,253; working oxen, 67,033; milch cows, 139,260; sheep, 964,333; swine over 6 months old, 239,832; mules, 106.

There were 254 flouring mills making 998,503 barrels of flour, giving employment to 604 persons, with an invested capital of $1,828,006, and a value in products of $3,567,978.34. The number of saw mills was 922, sawing 392,920,714 feet of lumber, with a value of $3,273,036. Capital invested, $2,442,577.50; persons employed, 4,579. Three oil mills produced 2,203 barrels, and the product of peppermint oil was 10,782 barrels;* 28 breweries made 36,392 barrels of beer, and 13 distilleries made 260,340 gallons of liquor; wine produced, 1,215 gallons; cider, 2,829½ barrels; barrels of fish packed, 47,203. Total capital invested in manufactures, $2,832,965, with a product of $3,604,712, giving employment to 5,769 persons. There were one iron and 29 copper mines, employing 2,312 persons, raising 6,417,881 pounds of mineral, valued at $962,961.34. Capital invested, $4,747,950. Value of imported merchandise, $13,733,122.09.

The Indians in Michigan, not enumerated in the census and retaining their tribal character, were 7,777.

Of the whole population 600,020 were native and 149,093 foreign-born. Born in Michigan, 294,828; in New York, 191,128; in Ohio, 34,235; in Pennsylvania, 17,460; and in Vermont 13,779. Less than 10,000 are credited to any other State. Of the foreign-born 38,787 were from Germany, 36,482 from British America, 30,049 from Ireland, and 25,743 from England.

In occupations 236,987 persons are classified. Farmers, 88,657; farm laborers, 35,884; laborers, 26,036; servants, 14,193; carpenters, 8,045; teachers, 4,222; clerks, 3,507; miners, 3,527; blacksmiths, 3,098; merchants, 2,282; masons, 1,683; sawyers, 1,387; lumbermen, 1,426; mariners, 1,163; physicians, 1,266; painters, 1,191; millers, 1,064; seamstresses, 1,154; shoemakers, 2,872; students, 1,200; tailors, 1,017; wheelwrights, 1,046; coopers, 1,579; clergymen, 1,046; fishermen, 1,058; and grocers, 1,087. In all other occupations the number was less than a thousand each.

There were 3,448 manufacturing establishments in 1860, with an invested capital of $23,808,226, giving employment to 23,190 persons, of whom 22,144 were males and 1,046 females. The cost of raw material was $17,635,611; annual wages paid, $6,735,047; value of annual products, $32,658,356. The first in rank were flour and meal mills, of which there were 314, with a capital of $3,089,536, paying for raw material $7,777,534, giving employment to 791 persons, whose annual wages amounted to $267,668; annual product $9,255,454. The next was lumber with 927 mills; capital, $7,594,105; cost of raw material, $3,309,578; hands employed, 6,673; cost of labor, $1,808,240; value of lumber, $7,040,190.

Thirty copper mines; capital, $4,325,500; cost of raw material, $139,600; hands employed, 3,631; paid for labor, $1,388,208; value of copper, $2,282,182. In one copper smelting works the value of product was $1,500,000. No other manufacture reached one million dollars in annual product.

In 1860 the farms in Michigan were valued at $160,836,495, having 3,476,296 acres of improved land, and 3,554,538 unimproved. The value of farming implements and machinery was $5,819,832. Number of horses 136,917; asses and mules, 330; milch cows, 179,543; working oxen, 61,686; other cattle, 238,615; sheep, 1,271,743; swine, 372,386. Total value of live stock, $23,714,771.

Bushels of wheat, 8,336,368; rye, 514,129; corn, 12,444,676; oats, 4,036,980; barley, 307,868; buckwheat, 529,916; clover seed, 54,408; grass seed, 8,045; peas and beans, 165,128; pounds of rice, 716; tobacco, 121,099; wool, 3,960,888; bushels of Irish potatoes, 5,261,245; sweet potatoes, 38,492. Value of orchard products, $1,122,074; of market garden products, $145,883; gallons of wine, 14,427; pounds of butter, 15,503,482; of cheese, 1,641,897; tons of hay, 768,256; pounds of hops, 60,602; of flax, 4,128; maple sugar, 4,051,822; beeswax, 41,632; honey, 769,282; tons of hemp, 726; bushels of flaxseed, 341; gallons of maple molasses, 78,998; of sorghum, 86,953. Value of home manufactures, $142,756; of animals slaughtered, $4,093,362.

According to the census of 1860, as compiled at Washington, rice was produced in each of the counties of Cass, Eaton, Hillsdale, Kalamazoo, and Monroe. Copies of the original schedules on file in the Secretary of State's office of Michigan do not show that rice was produced in either of these counties except Monroe. The quantity reported for this county is 154 pounds.

The valuation of real estate was $257,163,983, an increase of $197,376,728, or 330.13 per cent over the valuation of 1850. The value of personal property was $88,092,583. Total value of real and personal estate, $345,449,701.

In 1860 there were 109 political papers, 4 religious, 3 literary, and 2 miscellaneous, with an annual circulation of 11,606,596 copies. There were 8 daily papers.

The total number of families was 144,761.

There were 807 churches, valued at $2,334,040, with accommodations for 250,794 people. Of these, 4 were Advent, 123 Baptist, 15 Free Will Baptist, 13 Christian, 69 Congregational, 20 Dutch Reformed, 45 Episcopal, 7 Friends, 3 German Reformed, 35 Lutheran, 247 Methodist, 3 Moravian, 101 Presbyterian, 2 Reformed Presbyterian, 3 United Presbyterian, 88 Catholic, 6 Swedenborgian, 13 Union, 1 Unitarian, and 9 Universalist.

The number of libraries was 1,120, with 250,686 volumes. Colleges 10, with 79 professors and 1,631 students. Public schools 4,007, with 5,825 teachers and 201,391 pupils. Academies and other schools 84, with 184 teachers and 9,683 pupils.

The average wages for a farm hand with board was $15.27 per month; for a day laborer with board, 76 cents; without board, $1.04; carpenter per day without board, $1.69; female domestic with board, per week, $1.40. Price of board to laboring men, $2.31 per week.

The product of fisheries was $456,117 from 186 establishments, employing 992 hands and paying $117,776 annual wages.

STATE CENSUS OF 1864.

The population of Michigan in 1864 was 803,661; number of males 412,208; females, 391,453. The following table gives by county the total population and number of each sex:

Counties.	Total.	Males.	Females.	Counties.	Total.	Males.	Females.
Allegan	18,835	9,802	9,033	Leelanaw	2,389	1,303	1,086
Alpena	674	459	215	Lenawee	40,199	20,319	19,880

Totals					803,661	412,208	391,453

The population by age was returned as follows:

	Males.	Females.
Under 5 years of age	65,032	61,349
5 and under 10	60,624	57 014
10 and under 21	87,722	------
10 and under 18	------	69,203
18 and under 40	------	138,615
21 and under 45	130,035	------
40 and under 75	------	63,022
45 and under 75	65,954	------
75 and over	------	2,250
75 and under 90	2,718	------
90 and under 100	111	------
100 and over	12	
Totals	412,208	391,453

Number of married males, 144,318; married females, 147,007. Number of marriages during the preceding year, 4,810; deaths, 11,458. Number of blind, 272; deaf and dumb, 263; insane or idiotic, 645; colored persons, 8,244.

The number of acres of taxable land is returned at 12,086,664; acres owned by individuals or companies, not taxable, 323,911; acres improved, 3,677,645; acres sowed with wheat, 801,858; corn harvested the preceding year: acres, 427,529; bushels, 11,007,293; wheat harvested the preceding year: acres, 843,881; bushels, 9,688,627; bushels of all other kinds of grain raised the preceding year, 4,195,244. Other crops raised the preceding year: Bushels of potatoes, 4,059,271; tons of hay, 843,346; pounds of wool, 7,249,934; pounds of pork marketed, 33,137,002; pounds of butter made, 13,836,452; pounds of cheese made, 1,530,945; pounds of sugar manufactured the present year, 4,044,399.

Live stock returned was as follows: Horses one year old and over, 179,083; number of mules, 1,115; neat cattle other than oxen and cows, one year old and over, 210,839; work oxen, 60,643; milch cows, 232,188; sheep, 2,053,363; and swine over six months old, 335,289.

The industrial statistics are as follows:

Flouring mills: Number, 398; runs of stone, 975; barrels of flour made the preceding year, 1,319,923; steam power; 74; water power, 323; persons employed, 1,040; capital invested, $2,840,925; value of products for the past year, $6,572,157. Saw mills: Number, 1,073; feet of lumber sawed, 622,477,904; steam power, 531; water power, 523; persons employed, 7,747; capital invested, $6,141,270; value of products the past year, $8,372,550. Oil mills: Number, 6; gallons of oil made the preceding year, 12,770; pounds of peppermint oil made the preceding year, 24,623. Distilleries: Number, 11; gallons of liquor made the preceding year, 284,332; gallons of wine made the preceding year, 5,551; barrels of cider made the preceding year, 64,816. Number of breweries, 95; barrels of beer made the preceding year, 56,926. Other manufactories: Steam power, 303; water power, 139; persons employed, 8,142; capital invested, $5,232,519; value of products the past year, $9,321,793.

The capital invested in fisheries was $145,429, and there were 39,848 barrels of fish caught the preceding year.

The number of copper mines returned is 63, iron mines 6, and coal mines 3. A large quantity of plaster was mined, but the number of mines is not shown. The capital invested is returned at $5,010,386, but the capital is not shown for all the mines. The number of hands employed is returned at 6,164, and the aggregate value at place of mining of minerals produced the past year is stated at $3,401,696.

The value of merchandise imported the preceding year for the purpose of sale is stated at $10,537,921.

NATIONAL CENSUS OF 1870.

The census of Michigan for 1870 was compiled by the Secretary of State pursuant to the provisions of Act No. 137, Laws of 1871, and published in the "Statistics of Michigan, 1870." No summary of that census, or of the State Census of 1874, is here made, for the reason that the volumes can yet be readily obtained by persons who may wish to refer to them. Many of the most important facts contained in them are given,

the purpose of comparison, in the summary of the census of 1884, in the comparative tables.

ORGANIZATION, AND AREA OF COUNTIES, TOWNSHIPS, ETC.

n the first table following are given the dates of organization, descrip-
ı, and area of counties and townships, and in subsequent tables the dates
ncorporation of cities and villages, the counties in which located, and
rences to the orginal acts of incorporation. The area of counties and
nships has been obtained from orginal plats on file in the State Land
ce, and is exclusive of all meandered streams, lakes, etc.
he total numbers of acres in the State is 36,443,346.20, equal to 56,943
are miles. This is 1,972 square miles less than the total area of the
e as given in the United States Census of 1880.

Organization, Description, and Area of Counties and Townships. Corrected to July 1, 1886.

SUMMARY.

POPULATION.

The total population of Michigan, June 1, 1884, was 1,853,658. This is greater than the population June 1, 1880, as shown by the U. S. census, by 216,721, an increase of 13 and 24-hundredths per cent in four years.

Michigan first appears in a National census in the year 1800, when the number of inhabitants is stated at 551, all returned from Mackinac county. Wayne county at that census, contained, in the present area of Michigan, not less than 2,000 inhabitants, but was returned with Ohio. A small portion of the population enumerated in 1820 and in 1830 as in Michigan, was in territory now in the State of Wisconsin.

Since 1800 the increase of population has been as follows:

From	1800	to	1810,	4,211,	or	764	per cent.
"	1810	"	1820,	4,134,	"	87	"
"	1820	"	1830,	22,743,	"	256	"
"	1830	"	1840,	180,628,	"	571	"
"	1840	"	1850,	185,387,	"	87	"
"	1850	"	1860,	351,459,	"	88	"
"	1860	"	1870,	435,169,	"	58	"
"	1870	"	1880,	452,655,	"	38	"
"	1850	"	1854,	109,867,	"	28	"
"	1860	"	1864,	54,548,	"	7	"
"	1870	"	1874,	149,749,	"	13	"

Had the soldiers in the field been enumerated in 1864, the increase from 1860 to 1864 would have been nearly 90,000, or about 12 per cent, and from 1864 to 1870, about 345,000, or 41 per cent.

The average annual rate of increase in population from 1860 to 1870 was 4 and 69-hundredths per cent; from 1870 to 1880, 3 and 29-hundredths per cent; from 1870 to 1874, 3 and 2-hundredths per cent, and from 1880 to 1884, 3 and 16-hundredths per cent.

In the following table are shown the increase, per cent of increase and average annual increase of the population of Michigan, from census to census, and by decennial periods, since the year 1800:

TABLE 1.

Censuses.	Population.	Increase over previous Census.	Increase in 10 years—U. S. Censuses.	Increase in 10 years—State Censuses.	Per Cent of Increase over previous Census. THE SEXES.

The number of male inhabitants in the State, June 1, 1884, was 974,424; female, 879,028; number whose sex is not reported, 206. The proportion of the sexes seems to have varied but little in the past thirty years. In 1854 the females were 47 and 29-hundredths per cent of the total population; in 1864, 48 and 70-hundredths per cent; in 1870, 47 and 79-hundredths per cent; in 1874, 47 and 73-hundredths per cent; in 1880, 47 and 32-hundredths per cent; and in 1884, 47 and 43-hundredths per cent. That the proportion of females was somewhat greater in 1864 than at either of the other censuses, is undoubtedly owing to the absence in the field of soldiers who were not enumerated.

In 1854 the female population of Emmet county exceeded the male population by 76, and in 1874 the females outnumbered the males in Wayne county by 291, and in 1880 by 610. In 1864 there were more females than males in the counties of Calhoun, Wayne, Oakland, St. Joseph, and Washtenaw. These are the only instances at the census of 1854 or since, that the female inhabitants of a county have outnumbered the male inhabitants.

Of the native population in 1884, 48 and 77-hundredths per cent were females, and of the foreign-born population 44 and 8-hundredths per cent were females.

The following table shows, for the State and counties, the per cent of each sex to total population of both sexes, in the years 1884 and 1880:

The census law requires the "age at last birthday" of each and every inhabitant. The total number of inhabitants and the number of each sex at each age are shown in table 4. The table also shows for comparison, the corresponding totals for 1880. It will be noticed that at each census a greater population was reported at the even, than the odd years, except the odd years 25, 35, 45, etc. The tendency of enumerators to thus state ages approximately rather than accurately is graphically represented in the "Statistics of Michigan, 1870." The number of inhabitants returned in 1884 as aged one year doubtless includes a large number who were only eleven months, and a few who were only ten months, old at the date of the census.

Enumerators were instructed to report the ages of children under one year old in twelfths of a year. As in reporting the ages of those one year old and over no account was made of fractions of a year, so in reporting the ages of children under one year old no account should have been made of fractions of a month. If, on the first day of June, 1884, a child was not fully two months old, its age should have been reported one-twelfth, if not fully three months old—two-twelfths, etc. Enumerators seem not to have understood this, and have in a large number of cases returned children born in May, 1884, as one month, and sometimes two months, old, the explanation probably being that on the *day of the enumerator's visit* such children were nearly, or perhaps more than one month old, and possibly nearly two months old, the enumerators at the moment forgetting that the age on the first day of June should be given. In like manner children born in April are inaccurately returned as two months, and sometimes three months old; those born in March as three months, and sometimes four months, old, and so on back through all the months of the census year.

The column in the census schedule showing the "Month of birth" of children born during the census year afforded the data necessary to properly correct in a majority of cases, the ages of those returned as aged under one year, but in the case of children born in June and July, the first and second months of the census year, and returned as one year old, no correction was possible.

The average age of the male inhabitants June 1, 1884, was 26.47 years.
The average age of the male inhabitants June 1, 1870, was 24.91 years.
The average age of the native male inhabitants June 1, 1884, was 23.16 years.
The average age of the foreign-born male inhabitants June 1, 1884, was 34.83 years.
The average age of the female inhabitants June 1, 1884, was 25.41 years.
The average age of the female inhabitants June 1, 1870, was 23.68 years.
The average age of the native female inhabitants June 1, 1884, was 22.58 years.
The average age of the foreign-born female inhabitants June 1, 1884, was 34.09 years.

INHABITANTS AGED 100 YEARS AND OVER.

The number of inhabitants of the State June 1, 1884, aged 100 years and over was 30,—12 males and 18 females. Of the whole number 22 were white. 3 black, and 5 Indian; 4 were married and 26 widowed; 3 had been farmers, 1 a grocer, 1 a laborer, 1 a trapper, and for 24 the occupations were not reported. Ten were native and 9 had native parents. Of the native, 6,—5 of whom were Indians and 1 a black—were born in Michigan. The statistics of each are given in detail in the following table:

TABLE 8.

Counties.	No. of persons aged 100 and over.	Residence by Townships, Cities, and Wards.	Names.	Age.	Time of residence within this State-Yrs.	Sex.	Color.	Civil Condition.	Birthplace.	Birthplace of Parents.

		Hamtramck	Farrel, Annora	100	35	Female.	White	Widow	Ireland	Ireland.

FAMILIES AND DWELLINGS.

The whole number of families in the State is returned at 403,779, and the whole number of dwellings, 364,737. The average number of persons to each family is 4 and 59-hundredths, and to each dwelling, 4 and 9-tenths. The whole number of dwellings and average number of persons to each dwelling as here given is exclusive of 53 townships and wards, and a part of Manitou county, the returns from which do not show the number of dwellings.

The number of families in cities is returned at 108,557, and number of dwellings at 93,661. The average number of persons to each family is 4 and 7-tenths, and to each dwelling, 5 and 3-tenths.

POPULATION OF CITIES.

At the date of the census of 1884 there were in Michigan 49 incorporated cities. The number in 1880 was 43; in 1874, 38; in 1870, 29, and in 1864, 19. In 1884 the total population of the incorporated cities was 509,277; in 1880, 388,863; in 1874, 324,771; in 1870, 230,372; and in 1864, 130,158. The population of cities in 1864 was 16 per cent, in 1870, 19 per cent, in 1874, 24 per cent, in 1880, 24 per cent, and in 1884, 27 per cent, of the total population of the State. It is apparent that this rapid growth of urban population is in part due to increase in the number of incorporated cities as well as to increase in their population.

The 19 cities reported in the census of 1864 contained in 1884 a population of 328,872, an increase in 20 years of 153 per cent. The population outside of the same cities was 100 per cent greater in 1884 than in 1864. The 29 cities reported in the census of 1870 contained in 1880, 335,509 inhabitants, an increase of 46 per cent in ten years; and in 1884 the same cities contained 412,717 inhabitants, an increase of 79 per cent in 14 years, and of 23 per cent in the four years from 1880. The population outside of the same cities was 41 per cent greater in 1884 than in 1870. The 43 cities reported in the census of 1880 contained in 1884, 479,370 inhabitants, an increase in four years of 90,507 inhabitants, or 23 per cent. The population outside of the same cities was 8 per cent greater in 1884 than in 1880. The following statement exhibits these facts:

Population in 1864 of the 19 incorporated cities	130,158
Population of same cities in 1884	328,872
Increase in 20 years	198,714
Per cent of increase	153
Per cent of increase in 20 years of population outside of same cities	100
Population in 1870 of the 29 incorporated cities	230,372
Population of same cities in 1880	335,509
Increase in ten years	105,137
Per cent of increase	46
Per cent of increase in 10 years of population outside of same cities	31
Population in 1884 of the 29 incorporated cities in 1870	412,717
Increase in 14 years	182,345
Per cent of increase	79

Per cent of increase in 14 years of population outside of same cities	41
Population in 1874 of the 38 incorporated cities	324,771
Population of same cities in 1884	457,915
Increase in 10 years	133,144
Per cent of increase	41
Per cent of increase in 10 years of population outside of same cities	33
Population in 1880 of the 43 incorporated cities	388,863
Population of same cities in 1884	479,370
Increase in four years	90,507
Per cent of increase	23
Per cent of increase in four years of population outside of same cities	8

From the above it appears that during the twenty years, 1864–84, the per cent of increase of population of the 19 incorporated cities in 1864 was one and one-half times the per cent of increase of population in rural districts; from 1870 to 1880 the per cent of increase of population of the 29 incorporated cities in 1870, was one and one-half times the per cent of increase in rural districts; from 1870 to 1884 the per cent of increase of population of the 29 incorporated cities in 1870 was nearly twice the per cent of increase in rural districts; from 1874 to 1884 the per cent of increase of population of the 38 incorporated cities in 1874 was one and one-fourth times the per cent of increase in rural districts; and from 1880 to 1884 the per cent of increase of population of the 43 incorporated cities in 1880 was nearly three times the per cent of increase in rural districts.

VILLAGES.

There were in the State June 1, 1884, 209 incorporated villages with a population of 211,035. Adding to this the population of the incorporated cities, 509,277, and we have 720,312 as the total population of incorporated cities and villages, which is 38 and 86-hundredths per cent of the total population of the State. In other words nearly 40 per cent of the inhabitants of Michigan live in incorporated cities and villages.

RACE AND COLOR.

The number of white inhabitants June 1, 1884, was 1,830,480; black, 6,856; mulatto, 8,267; Indian, (out of tribal relations), 6,900; Chinese, 70, and race and color unknown, 1,085. The blacks and mulattoes together number 15,123, which is only 23 more than in 1880. The increase in the colored population since 1874 is 4,091. The Chinese in 1884 numbered two and one-half times the number enumerated in 1880.

The following table shows the total number of inhabitants of each race and color in Michigan in each of the years 1884, 1880, 1874 and 1870, and the increase and per cent of increase in the four years 1880–1884, the ten years 1874–1884, and the ten years 1870–1880. The "colored" for 1884, 1874, 1870, and probably for 1880, includes only negroes and persons of African descent.

TABLE 9.

* Minus sign shows a decrease.

The following table is printed for the purpose of showing the per cent of the number of inhabitants of each race and color to the total of all races and colors in the State in the years 1884, 1880, 1874, and 1870:

TABLE 10.

Race and Color.	1884.		1880.		1874.		1870.	
	Number.	Per Cent of Total.	Number.	Per Cent of Total.	Number.	Per Cent of Total.	Number.	Per Cent of Total.
All races and colors	[a] 1,852,573	100	1,636,937	100	1,334,031	100	1,184,282	100
White	1,830,480	98.81	1,614,560	98.63	1,322,999	99.17	1,167,751	98.61
Colored	[b] 15,123	.82	15,100	.92	11,032	.83	[c] 11,744	.99
Indian	6,900	.37	7,249	.44	.....	.....	4,787	.40

Japanese	.....	.....	1	.00	.....	.....	.....	.....

[a] Exclusive of 1,085 whose race and color is unknown.
[b] Includes 6,856 blacks and 8,267 mulattoes.
[c] Includes 5,521 blacks and 6,223 mulattoes.

The number of white inhabitants of cities June 1, 1884, was 501,238; black, 4,238; mulatto, 3,413; Indian, out of tribal relations, 165; and Chinese, 65.

Expressed approximately, one-fourth of the white, three-fifths of the black, two-fifths of the mulatto, and nearly all of the Chinese inhabitants of Michigan are residents of incorporated cities; and two-fifths of the white, seven-tenths of the black, one-half of the mulatto, and all of the Chinese inhabitants are residents either of incorporated cities or villages. The "colored" (black and mulatto) population of the State numbers 15,123. Of these 7,651, or more than one-half, reside in incorporated cities, and 9,323, or three-fifths, reside in cities and villages.

CIVIL OR CONJUGAL CONDITION.

The number each of the single, married, widowed and divorced persons in Michigan has been reported at each State census taken since the adoption of the present constitution. The number of each class was also reported in the National census of 1880, but the figures of that enumeration have not yet been received at this office.

The number of married males reported in 1884 is 370,963; married females, 367,918; excess of males, 3,045. In 1874 the number of married males exceeded the number of married females reported by 1,611; in 1854, by 616; but in 1864 the married females exceeded the married males reported by 2,689. As noted in the census of 1874, the discrepancy in 1864 may be attributed to the war, but in 1884, 1874 and 1854 it is doubtless the result of difficulties in enumerating traveling men and other persons absent from home at the time of the enumeration. "Such persons are liable to be counted both at their homes and wherever they happen to meet the enumerator, and on the other hand may not in some instances be counted at all."

According to the census returns the proportion of the married people is slowly increasing in the State. In 1854 the married population was 34 and 13-hundredths per cent of the total population; in 1864, 36 and 24-hundredths per cent, and in 1874, 38 and 86-hundredths per cent, and in 1884, 39 and 87-hundredths per cent. The number of inhabitants of cities returned as married is 195,709, or 38 and 43-hundredths per cent of the total population of the cities. Of the total number of inhabitants of incorporated villages 43 and 25-hundredths per cent are returned as married.

The following table shows for the State and counties the per cent of married to total population in 1884, 1874, 1864 and 1854:

NATIVITY.

The nativity of the inhabitants of Michigan has never before been reported in a State census. The number of native inhabitants is now returned at 1,357,639; foreign-born, 486,968; and number whose nativity is unknown, 9,051. The increase in native population since 1880 is 109,210, and in foreign-born 98,460, or only 10,750 less than the increase of native inhabitants. The number of native inhabitants in 1880 was greater than in 1870 by 332,380, and the foreign-born by 120,498. In 1870 the foreign-born inhabitants were 22 and 63-hundredths per cent, in 1880, 23 and 73-hundredths per cent, and in 1884, 26 and 40-hundredths per cent, of the total population. Com-

pared with each other, to each 100,000 native inhabitants there were of foreign-born in 1870, 29,257; in 1880, 31,119; and in 1884, 35,869.

The following table shows for each county in the State the increase of the native and foreign-born inhabitants since 1880, and the per cent of increase of each class in the four years 1880–84, and the ten years 1870–80. The minus sign shows a decrease. Persons of unknown nativity are not included in the table.

PARENT-NATIVITY.

The parent-nativity of 50,334 inhabitants is not returned in the census. Deducting this number from the total population there remains 1,803,324 inhabitants, the nativity of one or both of whose parents is reported. In all the following calculations on parent-nativity in 1884 this number, 1,803,324, is used instead of the actual total population. Of this number the parents of 809,870 were native, 784,802 foreign-born, 112,671 had foreign-born fathers and native mothers, 71,964 foreign-born mothers and native fathers; 7,931 had native fathers, and 2,987 foreign-born fathers, nativity of the mothers being unknown; and 10,379 had native mothers, and 2,720 foreign-born mothers, the nativity of the fathers being unknown. Combining the above totals so as to show the foreign parentage alone, we find that on June 1, 1884, there were 900,460 inhabitants of this State who had foreign-born fathers; 859,486 who had foreign-born mothers; 784,802 whose parents were both foreign-born, and 975,144 whose parents were one or both foreign-born. Subtract-

ing from this last number the 486,968 inhabitants who were themselves born in foreign countries, and whose parents it may be assumed were all foreign-born also, we have 488,176 native inhabitants whose parents were one or both foreign-born. This number would, of course, be much greater had the nativity and parent-nativity of the entire population been reported.

By the census of 1870 as compiled at Washington, there were on June 1, of that year, 268,010 inhabitants of this State who were born in foreign countries; 459,537 who had foreign-born fathers; 444,958 who had foreign-born mothers; 416,336 whose parents were both foreign-born; and 488,159 whose parents were one or both foreign-born. Subtracting the number of inhabitants who were themselves foreign-born we have 220,149 native inhabitants whose parents were one or both foreign-born.

In 1870 the number of inhabitants whose parents were both foreign-born was 35 per cent, and in 1884, 44 per cent, of the total population; and in 1870 the number of inhabitants whose parents were one or both foreign-born was 41 per cent, and in 1884, 54 per cent, of the total population.

It will be observed that in each year the number of inhabitants having foreign-born fathers and native mothers is largely in excess of the number having foreign-born mothers and native fathers. In 1870 the excess amounted to 14,579, and in 1884 to 40,707. In 1870 the excess in the whole United States amounted to 415,606. The statistics of foreign parentage as enumerated in the census of 1880 were compiled at Washington for only 28 states, 7 territories, and the District of Columbia. Unfortunately Michigan is not one of the 28 states, hence we have no figures for that year.

Of the total population of cities in 1884, the parents of 154,252 were native; 286,248 foreign-born; 28,859 had foreign-born fathers and native mothers; 17,880 had foreign-born mothers and native fathers; 1,464 had native fathers, and 783 had foreign-born fathers, the nativity of the mothers being unknown; and 1,928 had native mothers, and 657 foreign-born mothers, the nativity of the fathers being unknown. The parent-nativity of 17,201 inhabitants of cities is not returned.

The following table shows for each of the years 1870 and 1884, the number, and, in per cent, the proportion of the inhabitants of the State, and of each county in the State, whose parents were one or both foreign-born:

INHABITANTS OF VOTING, SCHOOL, AND MILITARY AGES.

The number of males of voting ages in the State is 538,177. Of these, 150,178 are returned from the incorporated cities. This is 29 and 49-hundredths per cent of the total population of the cities. The number of males of voting ages returned from the State outside of the cities is 28 and 86-hundredths per cent of the population.

The number of inhabitants of school ages is 596,893, or 32 per cent of the total population. The number of persons of school ages returned from cities is 154,167 ,which is 30 and 27-hundredths per cent of the urban population, and the number from the State outside the cities is 442,726, or 32 and 93-hundredths per cent of the rural population.

The number of males in the State aged 18 to 45, (military ages) is 419,583, and of females aged 16 to 45, (child-bearing ages) is 400,343. Of the former 123,732, and of the latter 124,143, are returned from cities.

The following table shows for all and for each of the incorporated cities in Michigan, for the State, and for the State outside of the cities, the number of males of voting ages June 1, 1884, the number of votes cast for Governor in November, 1884, and the per cent of votes to males of voting ages. The cities are arranged in the order of such per cent, those in which the per cent is lowest being placed first.

State outside of cities					387,999	293,602	76

The small number of votes cast at the November, 1884, election compared with the number of males 21 years old and over in June of that year, in many of the northern cities, may be due, in part at least, to the large floating foreign-born male population who resort to these cities when not employed in the woods or elsewhere. As is well known, this class of inhabitants is very likely to be enumerated two or more times, once where they actually are at the time of the enumeration, and again at the place or places they call home. While this is true of all lumbering and mining regions it is emphatically the case in the Saginaw valley where there are nearly two-thirds as many foreign-born males—largely Canadians—as of native males, and where the inhabitants of foreign parentage outnumber those of native parentage by two to one.

SCHOOL ATTENDANCE.

Table VII., page 386, shows by age, nativity, and parent-nativity, the number of inhabitants of the State, June 1, 1884, returned as having attended school during the census year, and Table VIII., page 419, contains like statistics for the incorporated cities. The whole number of

inhabitants in the State returned as having attended school during the year is 378,493, of whom 2,224 were under 5, and 7,378 over 20 years of age. The number between the ages 5 and 20 years (school ages) is 368,891, which is nearly 62 per cent of the total population of these ages.

The number of pupils returned as native is 338,761. Of these 181,065 had native parents, 97,322 foreign-born parents, and 55,395 had one parent native and the other foreign-born. The parent-nativity of 4,979 is not reported. The number of pupils returned as foreign-born is 39,381. Of these 424 had native parents, 36,822 foreign-born parents, and 1,894 had one parent native and the other foreign-born. The parent-nativity of 241 is not reported. The native pupils are 25 per cent of the native inhabitants, and the foreign-born pupils 8 per cent of the foreign-born inhabitants; in other words 25 in each 100 of the native inhabitants and only 8 in each 100 of the foreign-born inhabitants, are returned as having attended school during the census year.

The number of native pupils aged 5 to 20 years returned is 330,496, which is 65 per cent of the native inhabitants of the same ages; and the number of foreign-born pupils aged 5 to 20 years returned is 38,063, or 43 per cent of the foreign-born inhabitants of the same ages; in other words, of the whole number of native inhabitants of school ages in the State, June 1, 1884, 65 in each 100, and of foreign-born inhabitants, 43 in each 100, are returned as having attended school during the census year.

The number of male inhabitants of the State returned as having attended school within the census year exceeds the number of females so returned by 9,519; the native males exceed the native females by 7,701, and the foreign-born males the foreign-born females by 1,655. The whole number of male pupils *of school ages* exceeds the whole number of female pupils of same ages by 8,801; the native males of school ages exceed the native females by 7,086, and the foreign-born males exceed the foreign-born females by 1,555. In the incorporated cities the female pupils as returned exceed the male pupils by 1,394. Of the pupils aged 5 to 10 years the males are in excess, but of those aged 10 to 15 and 15 to 20, the females exceed the males by 1,491.

The following table is published for the purpose of showing for the counties the per cent each of the native and foreign-born inhabitants returned as having attended school during the census year.

ILLITERACY.

The statistics of illiteracy—Tables IX. and X., pages 420 to 459—are tabulated so as to show in separate sections of the table, first, the number of persons at the ages 10 to 21, and 21 and over, who cannot read or write, by sex, nativity, and parent-nativity; second, like statistics of persons who can read but cannot write, and third, of persons whose education is not reported.

The number of persons in the State 10 years of age and upwards returned as unable to read or write is 80,131, which is also the whole number returned as unable to read. The number returned as able to read but unable to write is 31,082. Combining these two sums we have 111,213, the total number of persons returned as unable to write, which is seven and nine-tenths per cent of the population 10 years of age and over.

In 1880 there were only 47,112 persons returned as unable to read, and 63,723 as unable to write, which is five and two-tenths per cent of the population 10 years of age and upwards. The increase since 1880 of the number unable to read as indicated by the figures is 33,019, and of the number unable to write, 47,490. Of course such an enormous increase in four years is impossible. There is either serious deficiency in the returns of the illiterates in 1880, or equally serious exaggeration in the returns for 1884. Assuming the returns in 1880 to be accurate, and that

the per cent of illiterate persons to population 10 years old and over has not changed, the number of persons who cannot write as returned in 1884 is about 38,000 too large; assuming the returns in 1884 to be accurate, the number returned in 1880 is nearly 34,000 too small.

In the tables of illiteracy as published in the census of 1880 only the totals for the states and territories are given. These show the aggregate number of persons in each state and territory 10 years of age and upward returned as unable to read, and the number unable to write; also the number each of native and foreign white, and of colored persons, unable to write; and by sex, the number each of white and colored persons 10 to 14 and 15 to 20, both inclusive, and 21 years of age and upward, unable to write.

The number of native persons who cannot write as returned in the present census is 73 per cent greater, and of foreign-born persons 75 per cent greater than the number returned in 1880. In this comparison it is assumed that all "colored" illiterates in 1880 were native. The comparison is valuable only as showing that according to the returns the per cent of increase of the native and foreign-born illiterates is substantially the same.

There seems to be no way of determining whether there is a deficiency in the returns for 1880, or exaggeration in those for 1884, unless it be by examining the schedules used at the two enumerations, and the instructions for filling them.

The schedules used in 1880 provide for a report of the number of persons who could not read and the number who could not write in separate columns placed under the general heading "Education." These columns were headed respectively "Cannot read, |," and "Cannot write, |," and the instructions to the enumerators were that in making entries in these columns "an affirmative mark only will be used—thus, |."

Now it is obvious that neither the supervisors of census districts in 1880, nor the compiler of the census at Washington, could discover any error in, or omission from, these columns. The omission of an "affirmative mark" opposite the name of any person was deemed equivalent to a statement that the person could read or write.

The schedules used at the enumeration of 1884, like those used in 1880, require a report of the persons who could not read and of those who could not write, in separate columns placed under the general heading "Education," but the columns were headed respectively "Can read, 'Yes' or 'No,'" and "Can write, 'Yes' or 'No.'"

The absence of an entry opposite the name of any person is taken as *no report* respecting that person. The number of such omissions is 11,124, that is, there is a "Yes" or "No" answer opposite the names of all persons 10 years old and over, enumerated in 1884, except 11,124. The census enumerators in 1884 could not therefore have returned more illiterate persons than were actually inhabitants of the State at the date of enumeration unless they wrote "No" where "Yes" was the proper answer, and thus made false entries.

Of the 80,131 persons returned as unable to read or write, 26,853 are native and 53,053 foreign-born, the nativity of 225 being unknown. Of the native, 15,743 had native parents, 6,338 had foreign-born parents,

and 2,359 had one parent native and the other foreign-born. Of the foreign-born 453 are returned as having native parents, 51,585 as having foreign-born parents, and 489 one parent native and the other foreign-born. Exclusive of persons of unknown nativity and of unknown parent-nativity, the number of illiterate natives whose parents were native is 15,743, as compared with 51,585 illiterate foreign-born inhabitants, whose parents were foreign-born; and the number of illiterate natives whose parents were one or both native is 19,044, as compared with 60,771 illiterate foreign-born inhabitants whose parents were one or both foreign-born.

The number of males of voting ages returned as unable to read or write is 35,850, of whom 10,640 are native and 25,079 foreign-born. The nativity of 131 is not returned. Of the 10,640 native, 6,458 had native parents, 2,129 foreign-born parents, and 819 one parent native and the other foreign-born. Of the 25,079 foreign-born, 239 had native parents, 24,276 foreign-born parents, and 268 one parent native and the other foreign-born.

Of the whole number of males, then, of voting ages unable to read or write, 6,458 were native and born of native parents, as against 24,276 who were foreign-born and born of foreign-born parents; and the number of natives whose parents were one or both native, is 7,784, as against 27,492 foreign-born whose parents were one or both foreign-born.

The number of inhabitants of incorporated cities returned as unable to read or write is 21,811, or more than one-fourth of the whole number in the State. Of the whole number in cities returned as unable to read or write, 4,438 are native, and 17,350 are foreign-born. The number of males of voting ages in cities returned as unable to read or write is 9,492. Of these 1,566 are native, 7,912 foreign-born, and 14 of unknown nativity.

The following table shows for the State and counties the number and per cent of native and foreign-born illiterate inhabitants ten years of age and over:

TABLE 16.

THE DEFECTIVE CLASSES.

Compared with the census for 1880 there is an apparent decrease in the number of insane, idiotic, blind, and deaf-mute classes. The following table gives the totals of the several classes as returned at the two censuses:—

Classes.	1884.	1880.
Insane	2,644	2,796
Idiots	1,527	2,181
Blind	1,224	1,289
Deaf-mutes	1,007	1,166
Epileptic	1,137	-----
Dumb	171	-----

The decrease in the number of insane is 152, of blind 65, of deaf and dumb 159, and of idiots 654. The persons returned as dumb only in 1884, should, very largely at least, be regarded as idiotic. If all be thus regarded, the total number of idiots returned in 1884 is 1,698, or 483 less than returned in 1880.

Unquestionably the efforts made in 1880 to secure a complete enumeration of the insane, idiotic, blind, and deaf-mute classes was more than ordinarily successful, yet it is believed that the deficiency in the return of these classes in 1884 is by no means so great as the above figures seem to indicate.

Since 1873 statistics of the insane, deaf and dumb, and blind, and since 1879 statistics of the epileptic and idiotic persons in Michigan, have been returned to and compiled in this office annually. Comparing

the returns for the different years with each other it is found that enumerators experience great difficulty in distinguishing between the epileptic and insane, and also between the epileptic or insane on the one hand and the idiotic on the other. It frequently happens that persons returned as epileptic one year are returned the next year as insane, and *vice versa*, and in other years as idiotic.

These facts suggest that in 1880 epileptic persons may have been classed with the insane and idiotic. If so, comparison can only be made of the total of the three classes as returned in 1884, with the total of the two classes as returned in 1880. The total number of insane and idiotic returned in 1880 is 4,977, and the total number of insane, epileptic, and idiotic (classing the dumb with the idiotic) returned in 1884 is 5,479, or 502 more than returned in 1880. Assuming the return in 1880 to be correct, and that the increase of these classes has no more than kept pace with the increase of population, the increase from 1880 to 1884 was 658, or 156 more than indicated by the above figures.

The decrease in the number of blind may be in part due to the method of compiling adopted in this office, which was to exclude all whose vision was not so far destroyed as to make them, practically, totally blind. The whole number of such persons excluded from the tables is 421,—291 males and 130 females. A like rule was followed in tabulating the deaf and dumb persons, all who were returned as deaf only being excluded from the tables. There were 1,909 such persons, of whom 1,063 were males and 846 females. It is more than probable that a number of these were deaf and dumb. In the annual return of the defectives to this office, already referred to, the mistake of reporting a deaf and dumb person as deaf only is frequently made, the error being easily discovered by examining certain details of each return, particularly age, time afflicted, and cause of malady, included in those returns, but excepting age, not reported in the census.

The difficulties met with in every effort to secure statistics of the defective classes are stated as follows by Mr. Fred. H. Wines, special agent at the census of 1880:

"The difficulty of enumerating the defective classes with any approach to accuracy is very great. In the first place, there are no distinct boundary lines between normal and abnormal conditions of the senses or of the nervous system. How often the sanity or insanity of persons occupying the diffused border line between the two is a matter of furious controversy in newspapers and before the courts. It is almost as hard to say who should be classed as an idiot as it would be to determine at what stage of intemperance one becomes a drunkard. Different observers would form different conclusions. Similarly it is difficult to say at what stage of impaired vision one becomes blind, or of impaired hearing deaf. Yet the determination of these difficult questions is necessarily left to the untrained judgment either of the enumerator or of the head of the house, or it may be of the servant who comes to the door."

"But if there were no obstacle in the way of determining who ought to be included in the defective classes, there would be an almost insurmountable obstacle in the reluctance of friends to publish the infirmities of those dear to them, and the respect felt for this sentiment by enumerators, who hesitate to put disagreeable and, possibly, needless questions."

The following tables show, by sex, the color and civil condition, and the nativity and parent-nativity of each of the defective classes as returned in 1884:

TABLE 17.

Classes.	Sex.	Totals.	Color.					Civil Condition.

PERSONS SICK OR TEMPORARILY DISABLED ON DAY OF ENUMERATOR'S VISIT.

The number of persons who were sick or temporarily disabled on the day of the enumerator's visit in June, 1884, is 19,064,—10,378 males and 8,686 females. The total number is 915 less than the number of deaths returned as having occurred during the year ending June 1, 1884. The statistics of the sick and disabled inhabitants are shown in Table XIII., page 467. In this table is shown by sex, and age in periods of years, the number sick or disabled from each specified disease or disability.

The number at each period of age who were sick or disabled is as follows:

Under 5 years of age	545	45 to 50 years of age	1,321
5 to 10 years of age	717	50 to 55 years of age	1,341
10 to 15 years of age	763	55 to 60 years of age	1,140
15 to 20 years of age	1,061	60 to 65 years of age	1,224
20 to 25 years of age	1,379	65 to 70 years of age	1,198
25 to 30 years of age	1,456	70 to 75 years of age	1,093
30 to 35 years of age	1,311	75 to 80 years of age	826
35 to 40 years of age	1,366	80 and over	835
40 to 45 years of age	1,476	Age unknown	12

WAGE-WORKERS UNEMPLOYED.

The number of wage-workers in Michigan, June 1, 1884, returned as having been unemployed some portion of the census year, is 69,027, of whom 64,390 are males and 4,637 females. Of the total number 338 are returned as having been unemployed less than one month, 7,450 one month, 13,497 two months, 13,891 three months, 14,502 four months, 6,311 five months, 7,663 six months, 1,014 seven months, 1,400 eight months, 793 nine months, 773 ten months, 413 eleven months, and 982 twelve months.

OCCUPATIONS.

The whole number of inhabitants ten years old and over in the State, June 1, 1884, was 1,408,402,—748,203 males and 660,199 females. The number of native inhabitants ten years old and over was 951,896—489,724 males and 462,172 females; and the number of foreign-born inhabitants of the same ages was 449,226—252,928 males and 196,298 females.

Of the total number of inhabitants ten years old and over the occupations of 630,852—565,901 males and 64,951 females—are reported. The number of males whose occupations are reported is 75 and 6-tenths per cent of the total male population of these ages. In 1880 the number of males ten years old and over whose occupations were reported is 514,191, or 78 per cent of the male population of the same ages in that year.

The number of males engaged in agriculture June 1, 1884, is 236,192, females, 1,000; number of males engaged in professional and personal service 115,113, females, 46,275; males engaged in trade and transportation 66,589, females, 2,491; males engaged in manufacturing, mechanical and mining industries 148,007, females, 15,185. The number of males engaged in agriculture is 32 per cent, in professional and personal service 15 per cent, in trade and transportation 9 per cent, and in manufacturing, mechanical and mining industries 20 per cent, of the total male population ten years old and over. In 1880 the number of males returned as engaged in agriculture is 36 per cent, in professional and personal service 16 per cent, in trade and transportation 8 per cent, and

in manufacturing, mechanical and mining industries 18 per cent of the total male population ten years old and over.

Comparing by nativity, the occupations of 70 per cent of the native males and 87 per cent of the foreign-born males, ten years old and over, are reported in 1884 as follows: 33 per cent of the native, and 29 per cent of the foreign-born as engaged in agriculture; 12 per cent of the native, and 22 per cent of the foreign-born as engaged in professional and personal service; 9 per cent of the native and 9 per cent of the foreign-born, in trade and transportation; and 16 per cent of the native and 27 per cent of the foreign-born, in manufacturing, mechanical and mining industries.

Of the whole number of persons whose occupations and nativity are reported in 1884, 62 per cent are native, and 38 per cent foreign-born; of those engaged in agriculture, 69 per cent are native and 31 per cent foreign-born; in professional and personal service 55 per cent are native, and 45 per cent foreign-born; in trade and transportation 66 per cent are native and 34 per cent foreign-born; and in manufacturing, mechanical and mining industries 55 per cent are native, and 45 per cent foreign-born.

The number of persons engaged in agriculture as returned in 1884 is 3,127 less than the number so returned in 1880. The following shows the total number of persons engaged in agriculture and in each specified branch of agriculture as returned in 1884 and 1880:

	1884.	1880.
Apiarists	149	57
Dairymen and Dairywomen	141	80
Farm overseers	85	39
Farmers	178,551	167,141
Farm laborers	55,347	70,845
Florists	122	84
Gardeners, nursery-men and fruit-growers	2,489	*a* 1,836
Stock-drovers	234	172
Stock-herders	31	43
Stock-raisers	35	20
Others in agriculture	8	3
Totals	237,192	240,319

a Returned as "gardeners, nursery-men and vine-growers."

It will be noticed that there is a decrease of farm laborers, 15,498, and of stock-herders, 11. The decrease of farm laborers is doubtless due in part to the fact that a greater number of this class are reported simply as "laborers" than in 1880.

The nativity of persons engaged in agriculture in 1884 is as follows: United States, 163,793; British America, 23,510; England, 9,605; Germany, 18,176; Ireland, 7,696; Sweden and Norway, 1,943; other countries, 11,675; nativity unknown, 794.

The largest number of persons returned as engaged in any one occupation is farmers, 178,551; of these 940 are females. The next largest number is laborers (not specified), 85,913; of these only 67 are females. The number of farmers born in the United States is 120,676, or nearly 68 per cent of the total number of farmers returned. The laborers born in the United States are 36,252, or 42 per cent of the total number.

The number of domestic servants returned is 31,712; of these 30,962 are females. Of the total number of female domestic servants 18,576, or 60 per cent, were born in the United States. The number of female domestic servants who were born in the United States is four per cent of the native female population ten years old and over, and the number born in foreign countries is six per cent of the foreign-born female population of the same ages.

The number of saloon-keepers and bar-tenders is returned at 3,894, 23 of whom were females. The number of this class born in the United States is 1,675, or 43 per cent of the total number, and the number born in foreign countries 2,197, or 57 per cent of the whole number. The number of brewers and maltsters returned is 557; of these the number born in the United States is 122, and in foreign countries, 434, or 78 per cent of the total number. Expressed approximately the foreign-born inhabitants who form but 26 per cent of the total population, furnish 57 per cent of the saloon-keepers and bar-tenders, and 78 per cent of the brewers and maltsters in the State.

The birthplaces of 22 saloon-keepers and bar-tenders, and of one brewer and malister, are not reported.

Of the foreign-born male saloon-keepers and bar-tenders 693 were born in British America, 142 in England, 633 in Germany, 233 in Ireland, 143 in Sweden and Norway, and 335 in other countries. Of the foreign-born male brewers and maltsters 20 were born in British America, 22 in England, 256 in Germany, 22 in Ireland, 2 in Sweden and Norway, and 111 in other countries. Of this class there was one female who was born in Germany.

Of the total number of inhabitants whose occupations are reported, 193,204 are inhabitants of incorporated cities. Of these, 4,752 are engaged in agriculture, 67,512 in professional and personal service, 39,683 in trade and transportation, and 81,257 in manufacturing, mechanical and mining industries. The number born in the United States is 100,091, in foreign countries 89,343, and 3,770 are of unknown nativity.

OCCUPATIONS OF FATHERS OF CHILDREN UNDER 15 YEARS OF AGE.

In Table XVII., page 514, are shown for the State, and for the incorporated cities in the State, the occupations of the fathers of children under fifteen years of age. The whole number of children in the State under fifteen years of age is 639,824. The occupations of the fathers of 593,479 children are returned as follows: Agriculture, 283,557; professional and personal service, 99,792; trade and transportation, 58,114; manufacturing, mechanical and mining industries, 152,016.

The number of children under fifteen years of age in the incorporated cities, the occupations of whose fathers are returned, is 152,425. Of these the fathers of 4,103 are engaged in agriculture, 44,976 in professional and personal service, 31,993 in trade and transportation, and 71,353 in manufacturing, mechanical and mining industries.

BIRTHS.

The number of births returned as having occurred in Michigan during the census year, is 53,775. The number returned by supervisors for the State registration reports is 40,979. The number occurring in each month as returned by census enumerators and registration officers respectively is shown in Exhibit 1:

Exhibit 1.

	Totals.	1883.							1884.					Unknown.
		June.	July.	August.	September.	October.	November.	December.	January.	February.	March.	April.	May.

Exhibit 2.

	Totals.	1883.							1884.					Unknown.
		June.	July.	August.	September.	October.	November.	December.	January.	February.	March.	April.	May.	
Births as returned by census enumerators	53,775	3,112	4,141	4,579	4,614	4,404	3,941	4,278	4,388	4,607	5,373	5,054	5,074	210
Per cent of births to be added as correction for time elapsing before enumeration	.....	32.68	29.95	27.24	24.52	21.80	19.08	16.36	13.64	10.92	8.20	5.48	2.76	.....
Number of births to be added as correction	9,008	1,017	1,241	1,247	1,131	960	752	700	599	503	441	277	140	.....
Births if enumerated in months of occurrence	62,783	4,129	5,382	5,826	5,745	5,364	4,693	4,978	4,987	5,110	5,814	5,331	5,214	210

The census returns show a greater number of births in each month of the census year except June, than is shown by the registration returns. The census returns for June are less than the registration returns, because a large number of children born in this month, and who were therefore eleven months old at the date of the enumeration, were reported to the census enumerators as one year old, and so returned by them. It is probable that some born in July were also returned as one year old. Of course none of these are reported as born during the census year. The probable manner in which the error occurred is explained on page cxxvii.

The method of correcting the returns of births because of time elapsing between the date of occurrence and date of enumeration is the same as for correcting the returns of deaths, and is fully explained on page clxxix.

The probable number of births during the year as found by applying the rule there given is shown in Exhibit 2 to be 62,783, or 9,008 in excess of the number returned by census enumerators, and 21,804 in excess of the number returned by supervisors for the registration reports.

Of the whole number of children returned as having been born during the year, 53,156 were white, 124 black, 216 mulatto, and 238 Indian. The color of 41 is not reported. The number born to native parents is 24,118; to foreign-born parents, 19,160; to foreign-born fathers and native mothers, 6,225; to foreign-born mothers and native fathers, 3,636; one parent native, the nativity of the other unknown, 332; one parent foreign-born, the nativity of the other unknown, 178; and nativity of both parents unknown, 126. The number of still-births returned is 1,034, of which 607 are males, 409 females, and 18 are of unknown sex. The number of still-births during the census year as returned by supervisors is 930.

The following table shows for the State, by nativity of both parents of the children, the number of mothers who bore their first, second, third, fourth, etc., child, during the census year:

TABLE 19.

The following table shows by sex and parent-nativity, the number of first, second, third, fourth, etc., children of their mothers born in Michigan during the census year. It is published mainly for the purpose of affording data for studying by parent-nativity the relative proportion of the sexes of first, second, third, fourth, etc., children.

The table shows the whole number of children returned as having been born in the State during the census year, including 696 pairs of twins and 4 sets of triplets. The twins and triplets are again tabulated in Table 24.

The greatest number of children returned as having been borne by any one woman is 25. The mother of these children was 40 years old. The enumerator informs the department by letter that the return is correct.

The following table shows for the children born to native parents, to foreign-born parents, to native fathers and foreign-born mothers, and to foreign-born fathers and native mothers, the number returned as the first, second, third, fourth, etc., child of their respective mothers, and the per cent of each of such numbers to the total number of children born during the census year of the same parent-nativity.

Unknown	1,582	6.56	2,266	11.83	337	9.27	589	9.46
Totals	24,118	100.	19,160	100.	3,636	100.	6,225	100.

The first, second, and third children born to native parents are respectively 24 and 79-hundredths per cent, 21 and 22-hundredths per cent, and 15 and 58-hundredths per cent of the whole number of children born to native parents during the census year; and the first, second, and third children born to foreign-born parents are repectively 14 and 31-hundredths per cent, 14 and 9-hundredths per cent, and 12 and 9-hundredths per cent, of the whole number of children born to foreign-born parents during the census year.

The per cent in the column "foreign-born parents" is greater than in the column "native parents" for each child after the third. The total number of first, second, and third children born to native parents is about 61 per cent of the whole number born to native parents, while the total number of first, second, and third children born to foreign-born parents is only about 40 per cent of the whole number born to foreign-born parents.

Comparing the column showing children born to native fathers and foreign-born mothers with the column showing children born to foreign-born fathers and native mothers, we find the number of first and second children born to the former was greater proportionally than to the latter, but that after the second child the reverse was generally the

case. If a diagram were drawn to show the proportion of first, second, third, fourth, etc., children born to each class of parents represented in the table, the line representing children born to native fathers and foreign-born mothers would run very close to the line representing children whose parents were both native; while the line representing children born to foreign-born fathers and native mothers would run very close to the line representing children whose parents were both foreign-born.

The number of first, second, and third children born to native parents is greater, proportionately, than the number born to foreign-born parents, mainly for the reason that the number of native inhabitants at the younger ages is greater, proportionately, than of the foreign-born inhabitants at the same ages. The number of native women aged 15 to 50 in the State is 314,597, and of foreign-born women 140,589. The proportion of native and of foreign-born at each period of age is shown in the following table:

TABLE 22.

Ages in Periods of Years.	Women aged 15 to 50 years.			
	Native.		Foreign-born.	
	Number.	Per Cent.	Number.	Per Cent.
15 to 20	72,803	23.14	17,997	12.80
20 to 25	63,430	20.16	24,115	17.15
25 to 30	52,316	16.63	22,822	16.23
30 to 35	39,811	12.65	21,627	15.38
35 to 40	34,221	10.88	20,354	14.47
40 to 45	29,325	9.32	18,458	13.13
45 to 50	22,691	7.21	15,216	10.82
15 to 50	314,597	100.	140,589	100.

About 23 per cent of the native as compared with 13 per cent of the foreign-born women are aged 15 to 20 years, and about 20 per cent of the native as compared with 17 per cent of the foreign-born are aged 20 to 25 years. At the ages 25 to 30 the proportion of native women is about the same as of the foreign-born, but at each period of age above 30 the proportion of foreign-born women is greater than of the native women.

The following table shows for the State the total number of children borne by mothers who during the census year bore their first, second, third, fourth, etc., child:

TABLE 23.

The following table shows by sex, parent-nativity, and number of the birth, the number of twin and triplet children born in Michigan during the census year. Each pair of twins and each set of triplets are compiled as single births; that is, if the mother had previously borne say five children, the twin or triplet children born during the census year are compiled as the sixth birth. The whole number of twin and triplet children returned is 1,404; of these 601 were born to native parents, 533 to foreign-born parents, 102 to native fathers and foreign-born mothers, and 146 to foreign-born fathers and native mothers. Of the native women with native husbands, 300, or 1 and 26-hundredths per cent., are returned as having borne twin and triplet children; and of the foreign-born women with foreign-born husbands, 265, or 1 and 40-hundredths per cent, are so returned:

following table shows the number each of native and foreign-born in certain counties of the State at each of the ages fourteen to fifty nclusive; the number by age of the native and foreign-born women

respectively who bore children during the census year, and the per cent of such native mothers to native women, and of foreign-born mothers to foreign-born women. The same counties are represented in this table as in Table 27.

TABLE 26.

48	3,166	1,733	17	17	.54	.98
49	2,676	1,334	8	18	.30	1.35
50	3,414	2,187	11	8	.32	.37
14 to 50 inclusive	220,380	80,490	19,968	12,644	9.06	15.71

From the above table it appears that the number of foreign-born women who bore children during the census year was greater proportionately than of the native women at each age except 15 and 17. Of the foreign-born women 15 and 71-hundredths per cent, or about one woman in six, and of the native women 9 and 6-hundredths per cent, or about one in ten, bore a child during the census year. Among foreign-born women the highest per cent of mothers to women is at the age 27, when 28 and 30-hundredths women in each one hundred bore children. Among native women the highest per cent is at 24, when 17 and 63-hundredths women in each one hundred bore children.

The following table shows the number of each sex of native and foreign-born inhabitants respectively, with totals of both nativities, in the counties represented in Tables 25 and 26.

TABLE 27.

The following table shows the number of children born during the census year in the counties of Allegan, Genesee, Ottawa, and St. Clair, to parents one or both of whom were native, but who were themselves the children of foreign-born parents. These counties have been selected because in them the ratio of the foreign-born to the native inhabitants is the same as in the entire State.

TABLE 28.

Counties.	Population.		Children born during census year.					
			Number born to			Number whose parents were one or both native, but whose grandparents were foreign-born.		
						Born to		
	Native.	Foreign-born.	Native parents.	Native fathers and foreign-born mothers.	Native mothers and foreign-born fathers.	Native parents.	Native fathers and foreign-born mothers.	Native mothers and foreign born fathers.
Allegan	32,176	6,397	656	50	135	63	25	66
Genesee	32,595	6,060	585	73	124	22	11	39
Ottawa	23,969	12,188	377	63	141	111	36	89
St. Clair	29,124	17,557	354	146	218	91	41	108
Totals	117,864	42,202	1,972	332	618	287	113	302

Of the whole number of children born during the census year in the counties named in the table, 1,972 had native parents, 332 had native fathers and foreign-born mothers, and 618 had native mothers and foreign-born fathers. The table shows that 287, or 14 and 55-hundredths per cent of the children born to native parents, 113, or 34 and 4-hundredths per cent of those born to native fathers and foreign-born mothers, and 302, or 48 and 87-hundredths per cent of those born to native mothers and foreign-born fathers, had foreign-born grand-parents. Assuming that these percentages will hold good for the entire State, of the 24,118 children born to native parents during the census year, 3,509 had foreign-born grand-parents; of the 3,636 children born to native fathers and foreign-born mothers, 1,238 had foreign-born grand-parents; and of the 6,225 children born to native mothers and foreign-born fathers, 3,042 had foreign-born grand-parents.

MARRIAGES.

The census law requires a return of the number of marriages during the census year, but provides no way of securing such return, except by enumeration. The difficulties in the way of a complete enumeration were at the outset fully appreciated by this Department. It is not the usual way of collecting such statistics, and serious doubts were entertained of the possibility of securing an accurate report. The blanks were prepared with great care, and the instructions to enumerators were very explicit. The question they were instructed to ask while enumerat-

ing each family was worded as follows: "Has any person, male or female, married during the year ending with May 31, 1884, who was, just previous to marriage, a member of this family?" The enumerators seem to have followed instructions with remarkable fidelity, for the number of marriages returned by them is 14,159, or 88 per cent of the number occurring in the same months as shown by the registration reports. At the United States census of 1870 the number of marriages in Michigan as returned by enumerators was 4,187, or only 41 per cent of the number as shown by the registration reports. Future returns by registration officers will probably add about 1,000 to the number of marriages already returned by them for the census year, making a total of about 17,000, or 3,000 more than returned by the census enumerators.

There are many more marriages returned for the later than for the earlier months of the census year; for instance, while for June, 1883, the first month of the census year, only 775 marriages are returned, the number reported for May, 1884, the last month of the census year, is 1,269. The latter number is probably very nearly correct, and is so largely in excess of the former, mainly, if not solely, for the reason that the marriages in May, having so lately occurred, were fresh in the minds of the inhabitants, and therefore reported, while those solemnized in June —a year previous—were, at the time of the enumerator's visit, forgotten.

In the following table is shown the number of marriages solemnized in Michigan in each month of the census year ending June 1, 1884, as returned by census enumerators and registration officers respectively, and the per cent which the number returned by census enumerators is to the number as shown by the registration reports:

	Totals.	Months.												
		1883.							1884.					Unknown.
		June.	July.	August.	September.	October.	November.	December.	January.	February.	March.	April.	May.	
Marriages as per census	14,159	775	836	784	1,151	1,443	1,430	1,450	1,171	1,094	1,165	1,320	1,269	271
Marriages as per registration reports	16,101	1,272	1,304	1,147	1,503	1,689	1,633	1,476	1,254	1,148	1,224	1,291	1,160	....
Per cent of number as per census to number as per registration reports	88	61	64	68	77	85	88	98	93	95	95	102	109	....

INHABITANTS JUNE 1, 1884, WHO WERE MARRIED DURING CENSUS YEAR.

The census law also requires a return of the number of marriages during the census year of persons who were inhabitants of the State June 1, 1884. The number of marriages of such persons is returned at 13,492, distributed by months as follows:

Months.	1883	Months.	1884
June	816	January	1,130
July	919	February	1,009
August	819	March	1,062
September	1,162	April	1,225
October	1,388	May	1,194
November	1,311	Unknown	92
December	1,365		

It will be noticed that the number of marriages returned as having occurred in each of the months, June, July, and August, is far below the number returned for any other month, the returns in this respect corresponding closely with the returns of marriages solemnized in the State.

Of the total number, 12,645 marriages are returned as having been solemnized in Michigan, 600 in the United States outside of Michigan, and 176 in foreign countries. For 71 couples the place of marriage is unknown. The number of white couples is 13,337; black and mulatto 105; Indian, 27; color unknown, 6. One white male married a black female, one, a mulatto female, and one, an Indian female; and three white females married black males, six, mulatto males, and five, Indian males.

The number of native couples is 7,030, foreign-born, 2,401; 1,404 foreign-born males married native females, and 1,069 native males married foreign-born females; 400 native and 129 foreign-born males married females whose nativity is not reported, 787 native and 242 foreign-born females married males whose nativity is not reported, and for 30 couples the nativity of neither the male nor female is reported.

DEATHS.

In the following table is shown the number of deaths in each month of the census year as returned by census enumerators, and also, for comparison, the number as returned by supervisors for the State registration reports of 1883 and 1884:

	Total number of deaths.	Months.												
		1883.							1884.					
		June.	July.	August.	September.	October.	November.	December.	January.	February.	March.	April.	May.	Unknown.
Deaths as per census	11,979	1,348	1,353	1,651	1,554	1,308	1,323	1,448	1,779	1,795	2,009	2,059	2,183	109
Deaths as per registration reports	16,880	1,254	1,439	1,651	1,613	1,401	1,397	1,598	1,087	1,181	1,421	1,382	1,456	...
Census returns in excess	3,099	94	.....	.....	.....	.....	.....	.....	692	614	648	677	727	109
Registration returns in excess	...	...	86	.....	59	93	74	150	.....	.....	.....	.....	.....	...

Deficiences in the enumeration or record of certain events—as births

and deaths—are now known by statisticians to be somewhat in proportion to the time elapsing between the occurrence of the event and the time of its enumeration or record. The above table furnishes a very good illustration of this general law.

Deaths for the entire census year were enumerated for the census in June, 1884, or immediately after the close of the year.

The enumeration of deaths occurring in the first seven months of the census year, June—December, 1883, was made by supervisors in April and May, 1884, or about one month earlier than by census enumerators, while for the last five months of the census year, January—May, 1884, the enumeration by supervisors was made in May, 1885, or eleven months after the enumeration for the census.

The number of deaths returned by census enumerators for the first seven months of the census year is 368 less than returned by the supervisors, while for the last five months of the year the number returned by census enumerators is 3,358 more than returned by supervisors. In other words, the delay of a month's time in enumerating the deaths occurring in the seven months, June—December, 1883, results in a loss to the census of 368 deaths; and a delay of eleven months time in enumerating the deaths occurring in the five months, January—May, 1884, results in a loss to the registration reports of 3,358 deaths.

It will be noticed that for the first seven months of the census year the number of deaths returned by enumerators is greater than returned by supervisors for only one month—June. The excess for this month is doubtless due to there having been reported to the enumerators a number of deaths that actually occurred in April and May.

The omission because of time elapsing between the date of the occurrence of deaths and the date of enumeration was calculated for Michigan by the compiler of the "Statistics of Michigan, 1870." The deaths as returned for that census for the year ending June 1, 1870, and for the State registration reports for the years 1869 and 1870, were collected by precisely the same methods, hence the compiler reasoned that the ratio of omissions by the two returns would be about the same for any two months. Comparing the census returns for December and January with the registration returns for the same months, he found that the deaths returned for January for the registration report should be increased by 98 and 9-hundredths per cent. As the deaths for January were enumerated for the registration reports one year after the enumeration for December he concluded that a delay of one year in the enumeration required that the deaths returned should be increased by 98 and 9-hundredths per cent, a delay of eleven months by eleven-twelfths of this per cent, of ten months, ten-twelfths, etc.

Adopting this method of correction for the present returns the per cent of omissions may be ascertained by the following proportion:

Census of 1884.				Registration.	
December.		January.		December.	January.
1,448	:	1,779	::	1,598	X

Whence X equals 1,963, the probable number of deaths that would have been returned by supervisors for January had the enumeration been made by them one year earlier. This number, 1,963, exceeds the num-

ber of deaths actually returned by supervisors for January by 876, an increase over the number returned (1,087) of 80 and 59-hundredths per cent, which is the per cent of deaths to be added for a delay of one year's time in enumeration.

Assuming that for the same length of time elapsing between the occurrence of deaths and their enumeration there would be the same per cent of omissions in the census returns as in the returns for the registration reports, we construct the following table, from which it appears that the probable number of deaths in the State during the census year was 27,937 instead of 19,979 as returned:

	Totals.	1883.							1884.					Unknown.
		June.	July.	August.	September.	October.	November.	December.	January.	February.	March.	April.	May.	
Deaths as returned by census enumerators	19,979	1,348	1,353	1,651	1,554	1,308	1,323	1,448	1,779	1,795	2,069	2,059	2,183	109
Per cent of deaths to be added as a correction for time elapsing before enumeration	.....	80.59	73.87	67.15	60.43	53.71	46.99	40.27	33.55	26.83	20.11	13.39	6.67	...
No. of deaths to be added as correction	7,958	1,086	999	1,109	939	703	622	583	597	482	416	276	146	...
Deaths if enumerated in months of occurrence	27,937	2,434	2,352	2,760	2,493	2,011	1,945	2,031	2,376	2,277	2,485	2,335	2,329	109

The per cent of deaths to be added because of one year's time elapsing before enumeration, as obtained from the comparison just made, is 17 and 50-hundredths less than obtained by comparing the deaths as returned by census enumerators and supervisors for the year ending June 1, 1870. This is probably due to the fact that the returns by supervisors are now made with greater accuracy than formerly.

The average age of persons returned as having died during the census year was 27 and 69-hundredths years. The average age of male decedents was 28 and 14-hundredths years, and of female decedents 27 and 11-hundredths years.

CHURCHES.

The number of church organizations in the State is returned at 2,864; parsonages, 1,117, and church edifices, 2,581. Thirty-seven church edifices are built of stone, 482 of brick, 2,023 are frame, 22 log, and there is no report of the material of which 17 are built. The seating capacity of churches is 792,414, and the value of church property, $13,296,151.

The number of church organizations in 1870 was 2,220, church edifices, 1,395; seating capacity, 447,476; value of church property, $8,947,491.

In the following table is shown for all and for each of the denominations in the State the number of church organizations, number and seating capacity of church edifices, and value of church property, as returned for this State in 1884 and 1870, and the number of parsonages in 1884:

SCHOOLS.

In the following table are shown the whole number of schools in the State, number of school buildings and material of construction, and value of school property, June 1, 1884; and by sex the number of teachers employed and their wages, the aggregate number of months of school, and average attendance of pupils during the year ending June 1, 1884.

TABLE 30.

	Number of Schools June 1, 1884.	Number of Teachers employed, year ending June 1, 1884.		Aggregate Number of Months of School, year ending June 1, 1884.			Wages paid, year ending June 1, 1884.			Average Attendance of Pupils, year ending June 1, 1884.	Number of School Buildings and Material of Construction, June 1, 1884.					Value of School Property, June 1, 1884.

Parochial schools	161	180	245	3,824	1,496	2,328	104,333	63,082	40,251	18,933	.....	42	111	8	.....	444,305
All schools	7,062	4,230	12,337	83,155	22,033	62,184	$2,917,913	$1,147,849	$1,924,334	295,991	77	1,007	5,409	516	57	$13,313,664

The value of district school property as given is exclusive of the value of thirty rented buildings. The material of which these rented buildings are constructed is unknown. Of the thirteen schools compiled as seminaries and academies, nine are returned as seminaries and four as academies. The wages paid teachers in seminaries and academies is exclusive of twenty months wages of men teachers and thirty-six months wages of women teachers; and the wages paid teachers in parochial schools is exclusive of 171 months wages of men teachers, and 493 months wages of women teachers.

The totals for district and graded schools as returned in the census and to the Superintendent of Public Instruction are as follows. In comparing it should be borne in mind that the census returns are for June 1, and the year ending June 1, 1884, while the returns to the Superintendent of Public Instruction are for the year ending September 1, 1884:

	Census.	Superintendents' Report.
Number of school districts	6,876	6,815
Number of men teachers employed	3,837	3,757
Number of women teachers employed	11,988	11,503
Aggregate number of months of school taught by men	18,565	18,708
Aggregate number of months of school taught by women	58,885	58,492
Wages paid men teachers	$863,844	$888,053
Wages paid women teachers	$1,849,751	$1,794,513
Average attendance of pupils	272,294	.....
Number of stone school-houses	76	76
Number of brick school-houses	943	1,000
Number of frame school-houses	5,296	5,478
Number of log school-houses	508	499
Number of school-houses, material of construction unknown	57	.....
Value of school property	$10,951,959	$10,945,178

LIBRARIES.

The number of libraries returned is 36,716, containing 4,806,749 volumes. In 1870 there were returned 26,241 libraries containing 2,188,048 volumes. The State totals for the different kinds of libraries are as follows for 1884:

Libraries.	Number.	Volumes.
Private	33,773	3,788,410
Ministers'	304	126,899
Lawyers'	223	95,626
Doctors'	335	87,334
Teachers'	23	18,055
Sabbath school	573	117,400
Town or city	432	214,758
Circulating	178	101,586
Public school	875	256,681

The library statistics are manifestly incomplete and the classification very imperfect. From some localities there are no returns of certain kinds of libraries, as for instance, no lawyers' libraries are returned from

East Saginaw, and some enumerators reported only libraries containing a large number of volumes. Sabbath school libraries seem to have been quite generally overlooked, the number returned being only one to each five church organizations. In 1870 there were 1,704 Sabbath school libraries reported, or three times as many as in 1884. The returns not sufficiently indicating their character, large numbers of ministers', lawyers', doctors' and teachers' libraries have undoubtedly been tabulated with the "private" libraries. The libraries belonging to the "public schools" and to "institutions of learning" have been tabulated together and number 875, containing 256,681 volumes, as compared with 169 libraries containing 49,052 volumes so returned in 1870.

In the following table are shown the total number of libraries in Michigan, and the number of each kind, classified according to the number of volumes, as returned June 1, 1884:

TABLE 31.
